Government National Mortgage Association
GINNIE MAE[®]
Guaranteed HECM MBS REMIC Pass-Through Securities
and MX Securities
Ginnie Mae REMIC Trust 2025-H05

The Securities

The Trust will issue the Classes of Securities listed on the front cover of this offering circular supplement.

The Ginnie Mae Guaranty

Ginnie Mae will guarantee the timely payment of principal and interest on the securities. The Ginnie Mae Guaranty is backed by the full faith and credit of the United States of America.

The Trust and its Assets

The Trust will own (1) Ginnie Mae HECM MBS or Ginnie Mae Platinum Certificates backed by HECM MBS and (2) certain previously issued certificates.

The securities may not be suitable investments for you. You should consider carefully the risks of investing in them. See “Risk Factors” beginning on page S-19 which highlights some of these risks.

The Sponsor and the Co-Sponsor will offer the securities from time to time in negotiated transactions at varying prices. We expect the closing date to be February 28, 2025. You should read the Base Offering Circular as well as this Supplement. The securities are exempt from registration under the Securities Act of 1933 and are “exempted securities” under the Securities Exchange Act of 1934.

- (1) This amount includes the Class GI Deferred Interest Amount and Class IE Deferred Interest Amount as of the Closing Date.
- (2) These Securities may be exchanged for MX Securities described in Schedule I to this Supplement.
- (3) Subject to increase as described under “Increase in Size” in this Supplement. The amount shown for each Notional Class (indicated by “NTL” under Principal Type) is its original Class Notional Balance and does not represent principal that will be paid.
- (4) As defined under “Class Types” in Appendix I to the Base Offering Circular. The Class Notional Balance of each Notional Class will be either reduced or increased, as applicable, as shown under “Terms Sheet — Notional Classes” in this Supplement.
- (5) See “Yield, Maturity and Prepayment Considerations — Final Distribution Date” in this Supplement.
- (6) See “Terms Sheet — Interest Rates” in this Supplement.
- (7) Class IE is entitled to receive the Class IE Deferred Interest Amount, which amount equals approximately \$335,210 as of the Closing Date and which amount is not included in the balance set forth in the table above. See “Terms Sheet — Deferred Interest Amount for Class IE” in this Supplement.
- (8) Class GI is entitled to receive the Class GI Deferred Interest Amount, which amount equals approximately \$95,750 as of the Closing Date and which amount is not included in the balance set forth in the table above. See “Terms Sheet — Deferred Interest Amount for Class GI” in this Supplement.

AVAILABLE INFORMATION

You should purchase the securities only if you have read and understood the following documents:

- this Offering Circular Supplement (this “Supplement”),
- the Base Offering Circular,
- the HECM MBS Base Prospectus dated October 1, 2007, November 1, 2013, June 1, 2014 or July 1, 2023, as applicable (the “HECM MBS Base Prospectus”),
- each HECM MBS Prospectus Supplement relating to the HECM MBS (the “HECM MBS Prospectus Supplements,” together with the HECM MBS Base Prospectus, the “HECM MBS Disclosure Documents”),
- the Platinum Certificates Base Offering Circular, dated July 1, 2023 (the “Platinum Base Offering Circular”),
- each Platinum Certificate Offering Circular Supplement relating to the Ginnie Mae Platinum Certificates backed by HECM MBS (the “Platinum Certificate Offering Circular Supplements,” together with the Platinum Base Offering Circular, the “Platinum Disclosure Documents”) and
- in the case of the Group 5, 6, 7 and 8 Securities, the disclosure documents relating to the Underlying Certificates (the “Underlying Certificate Disclosure Documents”).

The Base Offering Circular, the HECM MBS Disclosure Documents, the Platinum Disclosure Documents and the Underlying Certificate Disclosure Documents are available on Ginnie Mae’s website located at <http://www.ginniemae.gov> (“ginniemae.gov”).

If you do not have access to the internet, call BNY Mellon, which will act as information agent for the Trust, at (800) 234-GNMA, to order copies of the Base Offering Circular. In addition, you can obtain copies of any other document listed above by contacting BNY Mellon at the telephone number listed above.

Unless otherwise specifically defined herein, please consult the standard abbreviations of Class Types included in the Base Offering Circular as Appendix I and the glossary included in the Base Offering Circular as Appendix II for definitions of capitalized terms.

16	Ginnie Mae II	10,241,820	(6)	50	1.500% to 2.344%
17	Ginnie Mae II	20,000,000	(6)	50	1.684% to 3.010%

(1) The Group 5, 6, 7 and 8 Trust Assets consist of the enumerated subgroups (each, a “Subgroup”).

(2) The Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets are HECM MBS (or, in the case of Pools 785139 and 785863, Ginnie Mae Platinum Certificates backed by HECM MBS) backed by participation interests (each, a “Participation”) in advances made to borrowers and related amounts in

respect of home equity conversion mortgage loans (“HECMs”) insured by FHA. See *“The Trust Assets — The Participations and the HECMs” in this Supplement*. Certain additional information regarding the HECM MBS and Ginnie Mae Platinum Certificates, including related pool numbers, is set forth in Exhibit A to this Supplement.

- (3) The HECM MBS Rate for each Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Asset is the weighted average coupon of its related Participation interest rates (“WACR”). WACR constitutes the Weighted Average Coupon Rate for purposes of this Supplement. See *“The Trust Assets — The Trust MBS” in this Supplement*.
- (4) For Groups 1 and 2, reflects the range of interest rates of the Participations (net of the related Servicing Fee Margin) underlying the related HECM MBS pools at issuance. For Groups 3, 4 and 9 through 17 and Subgroup 5A, reflects the range of approximate weighted average margins on the Participations (net of the related Servicing Fee Margin) underlying the related HECM MBS pools.
- (5) The applicable index for each of the Group 3 and 4 Trust Assets is twelve-month Adjusted CME Term SOFR (“One-Year Adjusted CME Term SOFR”). The actual HECM lifetime and annual caps on interest rate adjustments may limit whether the HECM MBS Rate for a particular Group 3 or 4 Trust Asset remains at One-Year Adjusted CME Term SOFR (as determined pursuant to the HECM loan documents) plus the applicable margin. See *“The Trust Assets — The Trust MBS” and “Risk Factors — Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities” in this Supplement*.
- (6) The applicable index for each of the Group 10, 11, 12, 13, 14, 15, 16 and 17 and Subgroup 5A Trust Assets is one-year CMT (“One-Year CMT”). The actual HECM lifetime and, with respect to Pools DF8424 and DG9028 included in each of the Group 11 and 12 Trust Assets, annual caps on interest rate adjustments may limit whether the HECM MBS Rate for a particular Group 10, 11, 12, 13, 14, 15, 16 or 17 or Subgroup 5A Trust Asset remains at One-Year CMT (as determined pursuant to the HECM loan documents) plus the applicable margin. See *“The Trust Assets — The Trust MBS” and “Risk Factors — Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities” in this Supplement*.
- (7) Certain information regarding the Underlying Certificate is set forth in Exhibits D and E to this Supplement.
- (8) The applicable index for each of the Group 9 Trust Assets is one-month Adjusted CME Term SOFR (“One-Month Adjusted CME Term SOFR”). The actual HECM lifetime caps on interest rate adjustments may limit whether the HECM MBS Rate for a particular Group 9 Trust Asset remains at One-Month Adjusted CME Term SOFR (as determined pursuant to the HECM loan documents) plus the applicable margin. See *“The Trust Assets — The Trust MBS” and “Risk Factors — Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities” in this Supplement*.

Security Groups: This series of Securities consists of multiple Security Groups (each, a “Group”), as shown on the front cover of this Supplement and on Schedule I to this Supplement. Except in the case of Classes F, IK, IM, IO, JI, KI and LI, payments on each Group will be based solely on payments on the Trust Asset Group or Subgroup with the same numerical designation.

Assumed Characteristics of the HECMs and the Participations Underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets: The assumed characteristics of the HECMs and the Participations underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets are identified in Exhibit A to this Supplement. The assumed characteristics may differ, perhaps significantly, from the characteristics of the HECMs and the related Participations as of the date of issuance of the related HECM MBS or Ginnie Mae Platinum Certificate, which characteristics are identified in the

related HECM MBS Prospectus Supplement or the related Platinum Certificate Offering Circular Supplement, as applicable. There can be no assurance that the actual characteristics of the HECMs and the Participations underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets will be the same as the assumed characteristics identified in Exhibit A to this Supplement.

Assumed Characteristics of the HECMs and the Participations Underlying the Group 6 through 8 and Subgroup 5B and 5C Underlying Certificates: The assumed characteristics of the HECMs and the Participations underlying the Underlying Certificates are identified in the respective updated Exhibit A for the Underlying Certificates (the “Updated Exhibit A”) in Exhibit E to this Supplement. The assumed characteristics may differ, perhaps significantly, from the characteristics of the HECMs and the related Participations as of the date of issuance of the related HECM MBS, which characteristics are identified in the related HECM MBS Prospectus Supplement. There can be no assurance that the actual characteristics of the HECMs and the Participations underlying the Underlying Certificates will be the same as the assumed characteristics identified in the Updated Exhibit A in Exhibit E to this Supplement.

Issuance of Securities: The Securities, other than the Residual Securities, will initially be issued in book-entry form through the book-entry system of the U.S. Federal Reserve Banks (the “Fedwire Book-Entry System”). The Residual Securities will be issued in fully registered, certificated form. See *“Description of the Securities — Form of Securities” in this Supplement.*

Modification and Exchange: If you own exchangeable Securities you will be able, upon notice and payment of an exchange fee, to exchange them for a proportionate interest in the related Securities shown on Schedule I to this Supplement. See *“Description of the Securities — Modification and Exchange” in this Supplement.*

Increased Minimum Denomination Classes: Each Regular and MX Class. See *“Description of the Securities — Form of Securities” in this Supplement.*

Interest Rates: The Floating Rate Classes and Components will bear interest at per annum rates based on a 30-day compounded average of the Secured Overnight Financing Rate (“SOFR”) (hereinafter referred to as “30-day Average SOFR”) as follows:

Class or Component	Interest Rate Formula(1)	Initial Interest Rate(2)	Minimum Rate(3)(5)	Maximum Rate(4)	Delay (in days)	30-day Average SOFR for Minimum Interest Rate
Security Group 2

Security Group 17						
FM	30-day Average SOFR + 0.75%	5.08760%	0.75000%	(4)	0	0.00000%

- (1) 30-day Average SOFR will be established as described under “Description of the Securities — Interest Distributions — Floating Rate Classes” in this Supplement.
- (2) The initial Interest Rate will be in effect during the first Accrual Period; the Interest Rate for each Floating Rate Class or Component will adjust monthly thereafter.
- (3) The minimum rate for any Accrual Period will be the lesser of (i) the rate indicated in this table under the heading “Minimum Rate” and (ii) the WACR or Underlying Certificate WACR for the related Trust Asset Group or Subgroup (or (v) in the case of Component FC1, the WACR for the Subgroup 5A Trust Assets less 0.05%, (w) in the case of Component FC2, the Underlying Certificate WACR for the Subgroup 5B Trust Asset less 0.71%, (x) in the case of Component FC3, the Underlying Certificate WACR for the Subgroup 5C Trust Asset less 0.41%, (y) in the case of Component FB1, the Underlying Certificate WACR for the Subgroup 6A Trust Asset less 0.75% and (z) in the case of Component FB2, the Underlying Certificate WACR for the Subgroup 6B Trust Asset less 0.45%).
- (4) Except as otherwise indicated in this table, the maximum rate for any Accrual Period will be the WACR or Underlying Certificate WACR for the related Trust Asset Group or Subgroup. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest*

that accrues on such class or component” and “— The Underlying Certificate WACR of the subgroup 5B, 5C, 6A, 6B and 6C trust assets may limit the amount of interest distributed to or accrued on the related floating rate and notional classes or components” in this Supplement.

- (5) The minimum rate and maximum rate for Class F for any Accrual Period will be limited by the aggregate interest accrued on its related REMIC Class for that Accrual Period.
- (6) The maximum rate for Component FC1 for any Accrual Period will be the WACR for the Subgroup 5A Trust Assets less 0.05%. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component” in this Supplement.*
- (7) The maximum rate for Component FC2 for any Accrual Period will be the Underlying Certificate WACR for the Subgroup 5B Trust Assets less 0.71%. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component” in this Supplement.*
- (8) The maximum rate for Component FC3 for any Accrual Period will be the Underlying Certificate WACR for the Subgroup 5C Trust Assets less 0.41%. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component” in this Supplement.*
- (9) The maximum rate for Component FB1 for any Accrual Period will be the Underlying Certificate WACR for the Subgroup 6A Trust Assets less 0.75%. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component” in this Supplement.*
- (10) The maximum rate for Component FB2 for any Accrual Period will be the Underlying Certificate WACR for the Subgroup 6B Trust Assets less 0.45%. *See “Risk Factors — The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component” in this Supplement.*

Each of the Floating Rate Classes and Components will bear interest during each Accrual Period at a per annum rate equal to the lesser of the related maximum rate and the result based on the related interest rate formula described above.

The approximate initial Interest Rates for the Interest Only Classes and Classes A and B are set forth in the table below.

Class	Approximate Initial Interest Rate(1)
Security Group 1	
A	4.47118%
Security Group 2	
IB	0.11987%
Security Group 3	
AI	2.73557%
Security Group 4	
IA	2.03823%
Security Group 5	
CI	0.83897%
IC	0.60852%
Security Group 6	
BI	0.56104%
Security Groups 5 and 6	
IO ⁽²⁾	0.76657%
JI ⁽²⁾	0.56985%
Security Group 7	
IE	2.61852%
Security Groups 3 and 7	
KI ⁽²⁾	2.62558%
Security Group 8	
GI	0.52858%
Security Groups 4 and 8

Security Group 16	
IL	1.13178%
Security Group 17	
MI	1.26013%
Security Groups 11, 12, 13, 14, 15, 16 and 17	
IM ⁽²⁾	1.03497%
LI ⁽²⁾	1.03497%

(1) The approximate initial Interest Rates for the Classes set forth in the table above (other than Classes BI, GI, IC, IE and JI) were calculated using the assumed characteristics of the Group 1 through 4 and 9 through 17 and Subgroup 5A HECMs and the Participations underlying the related

Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets set forth in Exhibit A, which are provided by the Sponsor as of February 1, 2025. In addition, the approximate initial Interest Rates for Classes KI, IK and IO were also calculated using the assumed characteristics of the Group 6, 7 and 8 and Subgroup 5B and 5C Underlying Certificates and the Group 6, 7 and 8 Subgroup 5B and 5C HECMs and the Participations underlying the Group 6, 7 and 8 Subgroup 5B and 5C Trust Assets set forth in Exhibit E, which are provided by the Sponsor as of February 1, 2025. The approximate initial Interest Rates for Classes BI, GI, IC, IE and JI were calculated using the assumed characteristics of the Group 6, 7 and 8 and Subgroup 5B and 5C Underlying Certificates and the Group 6, 7 and 8 and Subgroup 5B and 5C HECMs and the Participations underlying the Group 6, 7 and 8 and Subgroup 5B and 5C Trust Assets set forth in Exhibit E, which are provided by the Sponsor as of February 1, 2025. The assumed characteristics include rounded weighted average gross interest rates on the HECMs related to the Participations backing the Trust Assets. The actual initial Interest Rates for such Classes will be calculated based on the interest that accrues on each HECM, aggregated and then rounded to a different level of precision. Therefore the actual Interest Rates for such Classes may differ from the approximate initial Interest Rates set forth herein. On or about the first Distribution Date, investors can obtain the actual initial Interest Rates for such Classes for the related Accrual Period from the Trustee's website, www.usbank.com/abs.

(2) MX Class.

For purposes of this Supplement, the term "Underlying Certificate WACR" means the interest rate or the weighted average of the interest rates of the Underlying Certificate or Underlying Certificates, as applicable, included in the related Trust Asset Group or Subgroup, weighted based on the outstanding principal or notional balance, as applicable, of each Underlying Certificate for the related Distribution Date (before giving effect to any payments on such Distribution Date) for the related Trust Asset Group or Subgroup.

Each of Classes A, GI and IE is an HWAC Class that will bear interest during each Accrual Period at a per annum rate equal to the WACR or Underlying Certificate WACR, as applicable, of the related Trust Assets.

Each of Classes B, IK, IM, IO, JI, KI and LI is an MX Class that is an HWAC Class that will accrue interest during each Accrual Period at an equivalent annualized rate derived by aggregating the accrued interest on its related REMIC Classes for such Accrual Period expressed as a percentage of its outstanding principal or notional balance, as applicable, for such Accrual Period.

Interest Rate for each Interest Only Class or Component (other than Classes GI and IE and the MX Classes): For any Distribution Date, a per annum rate equal to the product of (i) 12 multiplied by (ii) the quotient of (a) the excess, if any, of (I) the interest accrued for the Accrual Period immediately preceding such Distribution Date on the related Trust Asset Group or Subgroup over (II) the sum of the Interest Accrual Amounts for all related Principal Bearing Classes or Components for such Distribution Date, divided by (b) the sum of the Class Principal Balances of the related Stripped Principal Bearing Classes or Components and the Deferred Interest Amount of the related Interest Only Class or Component as of the related Record Date for such Interest Only Class or Component.

Interest Rate for Classes GI and IE: For any Distribution Date, a per annum rate equal to the product of (i) 12 multiplied by (ii) the quotient of (a) the interest accrued for the Accrual Period immediately preceding such Distribution Date on the related Trust Asset Group, divided by (b) the outstanding notional balance of the related Trust Asset Group as of the related Record Date for such Class.

Distributions: On each Distribution Date, the following distributions will be made to the related Securities:

SECURITY GROUP 1

The Group 1 Available Distribution Amount will be allocated in the following order of priority:

1. To A, up to the Class A Interest Accrual Amount for such Distribution Date
2. To A, in reduction of its Class Principal Balance, until retired

SECURITY GROUP 2

The Group 2 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to BF and IB, pro rata based on their respective Interest Accrual Amounts, up to the Class BF Interest Accrual Amount and the Class IB Interest Accrual Amount for such Distribution Date
2. To BF, in reduction of its Class Principal Balance, up to the amount of the Class BF Principal Distribution Amount for such Distribution Date, until retired
3. To IB, until the Class IB Deferred Interest Amount is reduced to zero

SECURITY GROUP 3

The Group 3 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to AI and FA, pro rata based on their respective Interest Accrual Amounts, up to the Class AI Interest Accrual Amount and the Class FA Interest Accrual Amount for such Distribution Date
2. To FA, in reduction of its Class Principal Balance, up to the amount of the Class FA Principal Distribution Amount for such Distribution Date, until retired
3. To AI, until the Class AI Deferred Interest Amount is reduced to zero

SECURITY GROUP 4

The Group 4 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to AF and IA, pro rata based on their respective Interest Accrual Amounts, up to the Class AF Interest Accrual Amount and the Class IA Interest Accrual Amount for such Distribution Date
2. To AF, in reduction of its Class Principal Balance, up to the amount of the Class AF Principal Distribution Amount for such Distribution Date, until retired
3. To IA, until the Class IA Deferred Interest Amount is reduced to zero

SECURITY GROUP 5

The Subgroup 5A Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to CI and FC1, pro rata based on their respective Interest Accrual Amounts, up to the Class CI Interest Accrual Amount and the Component FC1 Interest Accrual Amount for such Distribution Date
2. To FC1, in reduction of its Component Principal Balance, up to the amount of the Component FC1 Principal Distribution Amount for such Distribution Date, until retired
3. To CI, until the Class CI Deferred Interest Amount is reduced to zero

The Subgroup 5B Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FC2 and IC1, pro rata based on their respective Interest Accrual Amounts, up to the Component FC2 Interest Accrual Amount and the Component IC1 Interest Accrual Amount for such Distribution Date

2. To FC2, in reduction of its Component Principal Balance, up to the amount of the Component FC2 Principal Distribution Amount for such Distribution Date, until retired

3. To IC1, until the Component IC1 Deferred Interest Amount is reduced to zero

The Subgroup 5C Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FC3 and IC2, pro rata based on their respective Interest Accrual Amounts, up to the Component FC3 Interest Accrual Amount and the Component IC2 Interest Accrual Amount for such Distribution Date

2. To FC3, in reduction of its Component Principal Balance, up to the amount of the Component FC3 Principal Distribution Amount for such Distribution Date, until retired

3. To IC2, until the Component IC2 Deferred Interest Amount is reduced to zero

SECURITY GROUP 6

The Subgroup 6A Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to BI1 and FB1, pro rata based on their respective Interest Accrual Amounts, up to the Component BI1 Interest Accrual Amount and the Component FB1 Interest Accrual Amount for such Distribution Date

2. To FB1, in reduction of its Component Principal Balance, up to the amount of the Component FB1 Principal Distribution Amount for such Distribution Date, until retired

3. To BI1, until the Component BI1 Deferred Interest Amount is reduced to zero

The Subgroup 6B Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to BI2 and FB2, pro rata based on their respective Interest Accrual Amounts, up to the Component BI2 Interest Accrual Amount and the Component FB2 Interest Accrual Amount for such Distribution Date

2. To FB2, in reduction of its Component Principal Balance, up to the amount of the Component FB2 Principal Distribution Amount for such Distribution Date, until retired

3. To BI2, until the Component BI2 Deferred Interest Amount is reduced to zero

The Subgroup 6C Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to BI3 and FB3, pro rata based on their respective Interest Accrual Amounts, up to the Component BI3 Interest Accrual Amount and the Component FB3 Interest Accrual Amount for such Distribution Date

2. To FB3, in reduction of its Component Principal Balance, up to the amount of the Component FB3 Principal Distribution Amount for such Distribution Date, until retired

3. To BI3, until the Component BI3 Deferred Interest Amount is reduced to zero

SECURITY GROUP 7

The Group 7 Available Distribution Amount will be allocated in the following order of priority:

1. To IE, up to the Class IE Interest Accrual Amount for such Distribution Date

2. To IE, until the Class IE Deferred Interest Amount is reduced to zero

SECURITY GROUP 8

The Group 8 Available Distribution Amount will be allocated in the following order of priority:

1. To GI, up to the Class GI Interest Accrual Amount for such Distribution Date

2. To GI, until the Class GI Deferred Interest Amount is reduced to zero

SECURITY GROUP 9

The Group 9 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to DI and FD, pro rata based on their respective Interest Accrual Amounts, up to the Class DI Interest Accrual Amount and the Class FD Interest Accrual Amount for such Distribution Date
2. To FD, in reduction of its Class Principal Balance, up to the amount of the Class FD Principal Distribution Amount for such Distribution Date, until retired
3. To DI, until the Class DI Deferred Interest Amount is reduced to zero

SECURITY GROUP 10

The Group 10 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to DF and ID, pro rata based on their respective Interest Accrual Amounts, up to the Class DF Interest Accrual Amount and the Class ID Interest Accrual Amount for such Distribution Date
2. To DF, in reduction of its Class Principal Balance, up to the amount of the Class DF Principal Distribution Amount for such Distribution Date, until retired
3. To ID, until the Class ID Deferred Interest Amount is reduced to zero

SECURITY GROUP 11

The Group 11 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to EI and FE, pro rata based on their respective Interest Accrual Amounts, up to the Class EI Interest Accrual Amount and the Class FE Interest Accrual Amount for such Distribution Date
2. To FE, in reduction of its Class Principal Balance, up to the amount of the Class FE Principal Distribution Amount for such Distribution Date, until retired
3. To EI, until the Class EI Deferred Interest Amount is reduced to zero

SECURITY GROUP 12

The Group 12 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to GF and IG, pro rata based on their respective Interest Accrual Amounts, up to the Class GF Interest Accrual Amount and the Class IG Interest Accrual Amount for such Distribution Date
2. To GF, in reduction of its Class Principal Balance, up to the amount of the Class GF Principal Distribution Amount for such Distribution Date, until retired
3. To IG, until the Class IG Deferred Interest Amount is reduced to zero

SECURITY GROUP 13

The Group 13 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FH and HI, pro rata based on their respective Interest Accrual Amounts, up to the Class FH Interest Accrual Amount and the Class HI Interest Accrual Amount for such Distribution Date
2. To FH, in reduction of its Class Principal Balance, up to the amount of the Class FH Principal Distribution Amount for such Distribution Date, until retired
3. To HI, until the Class HI Deferred Interest Amount is reduced to zero

SECURITY GROUP 14

The Group 14 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FJ, HF and IH, pro rata based on their respective Interest Accrual Amounts, up to the Class FJ Interest Accrual Amount, HF Interest Accrual Amount and the Class IH Interest Accrual Amount for such Distribution Date
2. Concurrently, to FJ and HF, in reduction of its Class Principal Balance, pro rata based on their respective Class Principal Balances up to the amount of the Group 14 Principal Distribution Amount for such Distribution Date, until retired
3. To IH, until the Class IH Deferred Interest Amount is reduced to zero

SECURITY GROUP 15

The Group 15 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FL, IJ, JF and KF, pro rata based on their respective Interest Accrual Amounts, up to the Class FL Interest Accrual Amount, IJ Interest Accrual Amount, JF Interest Accrual Amount and the Class KF Interest Accrual Amount for such Distribution Date
2. Concurrently, to FL, JF and KF, in reduction of its Class Principal Balance, pro rata based on their respective Class Principal Balances up to the amount of the Group 15 Principal Distribution Amount for such Distribution Date, until retired
3. To IJ, until the Class IJ Deferred Interest Amount is reduced to zero

SECURITY GROUP 16

The Group 16 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to IL and LF, pro rata based on their respective Interest Accrual Amounts, up to the Class IL Interest Accrual Amount and the Class LF Interest Accrual Amount for such Distribution Date
2. To LF, in reduction of its Class Principal Balance, up to the amount of the Class LF Principal Distribution Amount for such Distribution Date, until retired
3. To IL, until the Class IL Deferred Interest Amount is reduced to zero

SECURITY GROUP 17

The Group 17 Available Distribution Amount will be allocated in the following order of priority:

1. Concurrently, to FM and MI, pro rata based on their respective Interest Accrual Amounts, up to the Class FM Interest Accrual Amount and the Class MI Interest Accrual Amount for such Distribution Date
2. To FM, in reduction of its Class Principal Balance, up to the amount of the Class FM Principal Distribution Amount for such Distribution Date, until retired
3. To MI, until the Class MI Deferred Interest Amount is reduced to zero

Available Distribution Amount: For each of Security Groups 1 through 4 and 9 through 17 and Subgroup 5A, with respect to each Distribution Date, the excess, if any, of (a) the sum of (i) the product of (A) the original principal amount of the related Group or Subgroup, as applicable, HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS, as applicable, and (B) the Certificate Factor (including Ginnie Mae Platinum Factor) or Calculated Certificate Factor, as applicable, for the preceding Distribution Date and (ii) the interest accrued with respect to such HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS, as applicable, for the related Accrual Period over (b) the product of (i) the original principal amount of such HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS, as applicable, and (ii) the Certificate Factor (including Ginnie Mae Platinum Factor) or Calculated Certificate

Factor, as applicable, for the current Distribution Date. For each of Security Groups 6, 7 and 8 and Subgroups 5B and 5C, with respect to each Distribution Date, the amounts received in respect of the Group 6, 7 and 8 and Subgroup 5B and 5C Trust Assets, as applicable, on such Distribution Date.

For purposes of the definitions herein, the following Security and Trust Asset Groups or Subgroups and Classes or Components are related and categorized as follows:

Security Group	Trust Asset Group or Subgroup	Interest Only Classes or Components	Principal Bearing Classes or Components	
			Stripped Principal Bearing Classes or Components	Other Principal Bearing Classes
1	1	N/A	N/A	A
2	2	IB	BF	N/A
3	3	AI	FA	N/A
4	4	IA	AF	N/A
5	5A	CI	FC1	N/A
5	5B	IC1	FC2	N/A
5	5C	IC2	FC3	N/A
6	6A	BI1	FB1	N/A
6	6B	BI2	FB2	N/A
6	6C	BI3	FB3	N/A
7	7	IE	N/A	N/A
8	8	GI	N/A	N/A
9	9	DI	FD	N/A
10	10	ID	DF	N/A
11	11	EI	FE	N/A
12	12	IG	GF	N/A
13	13	HI	FH	N/A
14	14	IH	FJ, HF	N/A
15	15	IJ	FL, JF, KF	N/A
16	16	IL	LF	N/A
17	17	MI	FM	N/A

Deferred Interest Amount for each Interest Only Class or Component (other than Classes GI and IE and the MX Classes): With respect to any Distribution Date, the excess, if any, of (i) the sum of all Interest Accrual Amounts for such Interest Only Class or Component for each Accrual Period ending before such Distribution Date over (ii) the sum of (a) all amounts distributed in respect of such Class or Component on all prior Distribution Dates plus (b) the amount distributed as an Interest Accrual Amount in respect of such Class or Component on such Distribution Date, as specified for the related Security Group in “Terms Sheet — Distributions” in this Supplement. On or about each Distribution Date, the Deferred Interest Amount is available on reports published by the Trustee on its website, www.usbank.com/abs.

Deferred Interest Amount for Class GI: As of the Closing Date, equals approximately \$95,750, which represents the sum of the deferred interest amounts of the Underlying Certificates in Trust Asset Group 8. With respect to any Distribution Date after the Closing Date, the excess, if any, of (i) the sum of the Class GI Deferred Interest Amount as of the Closing Date plus all Interest Accrual Amounts for such Interest Only Class for each Accrual Period ending before such Distribution Date over (ii) the sum of (a) all

amounts distributed in respect of such Class on all prior Distribution Dates plus (b) the amount distributed as an Interest Accrual Amount in respect of such Class on such Distribution Date, as specified for the related Security Group in “Terms Sheet — Distributions” in this Supplement. On or about each Distribution Date, the Deferred Interest Amount is available on reports published by the Trustee on its website, www.usbank.com/abs.

Deferred Interest Amount for Class IE: As of the Closing Date, equals approximately \$335,210, which represents the sum of the deferred interest amounts of the Underlying Certificates in Trust Asset Group 7. With respect to any Distribution Date after the Closing Date, the excess, if any, of (i) the sum of the Class IE Deferred Interest Amount as of the Closing Date plus all Interest Accrual Amounts for such Interest Only Class for each Accrual Period ending before such Distribution Date over (ii) the sum of (a) all amounts distributed in respect of such Class on all prior Distribution Dates plus (b) the amount distributed as an Interest Accrual Amount in respect of such Class on such Distribution Date, as specified for the related Security Group in “Terms Sheet — Distributions” in this Supplement. On or about each Distribution Date, the Deferred Interest Amount is available on reports published by the Trustee on its website, www.usbank.com/abs.

Deferred Interest Amount for Classes IK, IM, IO, JI, KI and LI: With respect to any Distribution Date, the sum of the Deferred Interest Amounts for the related REMIC Classes shown on Schedule I to this Supplement.

Interest Accrual Amount for each Interest Only Class or Component (other than the MX Classes): For any Distribution Date, interest accrued during the related Accrual Period for such Distribution Date at the related Interest Rate on the Class Notional Balance of such Class or Component as of the related Record Date.

Interest Accrual Amount for Classes B, F, IK, IM, IO, JI, KI and LI: For any Distribution Date, the sum of the Interest Accrual Amounts for the related REMIC Class or Classes shown on Schedule I to this Supplement.

Interest Accrual Amount for Principal Bearing Classes and Components (other than the MX Classes): For any Distribution Date, interest accrued during the related Accrual Period for such Distribution Date at the related Interest Rate on the Class Principal Balance of such Class or Component as of the related Record Date.

Principal Distribution Amount for each Stripped Principal Bearing Class or Component (other than Classes FJ, FL, HF, JF and KF): For any Distribution Date, the product of (i) the excess, if any, of (a) the related Group or Subgroup Available Distribution Amount for such Distribution Date over (b) the sum of the Interest Accrual Amount for the Stripped Principal Bearing Class or Component and the Interest Accrual Amount for the related Interest Only Class or Component for such Distribution Date, and (ii) the quotient of (a) the Class Principal Balance of the Stripped Principal Bearing Class or Component as of the related Record Date divided by (b) the sum of (x) the Class Principal Balance of the Stripped Principal Bearing Class or Component as of the related Record Date and (y) the Deferred Interest Amount of the related Interest Only Class or Component as of the related Record Date.

Principal Distribution Amount for Groups 14 and 15 Trust Assets: For any Distribution Date, the product of (i) the excess, if any, of (a) the related Group Available Distribution Amount for such Distribution Date over (b) the sum of the Interest Accrual Amounts for all related Principal Bearing Classes and the Interest Accrual Amount for the related Interest Only Class for such Distribution Date, and (ii) the quotient of (a) the sum of the Class Principal Balances of all related Principal Bearing Classes as of the related Record Date divided by (b) the sum of (x) the Class Principal Balance of all related Principal Bearing Classes as of the related Record Date and (y) the Deferred Interest Amount of the related Interest Only Class as of the related Record Date.

Notional Classes: The Notional Classes will not receive distributions of principal based on their Class Notional Balances but have Class Notional Balances for convenience in describing their entitlements to interest. The Class Notional Balance of each Notional Class represents the percentage indicated below of, and reduces or increases to that extent with, the outstanding principal balance or notional balance of the related Trust Asset Group, Groups, Subgroup or Subgroups indicated:

<u>Class</u>	<u>Original Class Notional Balance</u>	<u>Represents Approximately</u>
Security Group 2		
IB	\$ 8,070,550	100% of the Group 2 Trust Assets
Security Group 3		
AI	2,136,330	100% of the Group 3 Trust Assets
Security Group 4		
IA	8,263,670	100% of the Group 4 Trust Assets
Security Group 5		
CI	93,616,540	100% of the Subgroup 5A Trust Assets
IC	6,389,315	100% of the Subgroup 5B Trust Asset and the Subgroup 5C Trust Asset (in the aggregate)
Security Group 6

(1) See “Terms Sheet — Interest Rates” in this Supplement

(2) See “Terms Sheet — Interest Rates” and “— Interest Rate for each Interest Only Class or Component (other than Classes GI and IE and the MX Classes)” in this Supplement.

Tax Status: Double REMIC Series as to each of the following Groups of Trust Assets and related Trust REMICs:

Trust Assets	Trust REMIC
Group 1 Trust Assets	Group 1 Pooling REMIC and Group 1 Issuing REMIC
Group 2 Trust Assets	Group 2 Pooling REMIC and Group 2 Issuing REMIC
Group 3 Trust Assets	Group 3 Pooling REMIC and Group 3 Issuing REMIC
Group 4 Trust Assets	Group 4 Pooling REMIC and Group 4 Issuing REMIC
Group 5 Trust Assets	Group 5 Pooling REMIC and Group 5 Issuing REMIC
Group 6 Trust Assets	Group 6 Pooling REMIC and Group 6 Issuing REMIC
Group 7 Trust Assets	Group 7 Pooling REMIC and Group 7 Issuing REMIC
Group 8 Trust Assets	Group 8 Pooling REMIC and Group 8 Issuing REMIC
Group 9 through 17 Trust Assets	Group 9 through 17 Pooling REMIC and Group 9 through 17 Issuing REMIC

Separate REMIC elections will be made as to each of the Trust REMICs identified above. See *“Certain United States Federal Income Tax Consequences”* in this Supplement and in the Base Offering Circular.

Regular and Residual Classes: Classes RR, RR1, RR2, RR3, RR4, RR5, RR6, RR7 and RR8 are Residual Classes. Each of the Residual Classes represents the Residual Interest of the related Trust REMICs, as described under *“Certain United States Federal Income Taxes — Residual Securities”* in this Supplement. All other Classes of REMIC Securities are Regular Classes. See *“Certain United States Federal Income Tax Consequences”* in this Supplement and in the Base Offering Circular.

RISK FACTORS

You should purchase securities only if you understand and are able to bear the associated risks. The risks applicable to your investment depend on the principal and interest type of your securities. This section highlights certain of these risks.

The rate of principal payments on the HECMs related to the participations underlying the trust assets will affect the rate of principal payments on your securities.

The rate at which you will receive principal payments will depend largely on the rate of principal payments, including prepayments, on the HECMs related to the participations underlying the trust assets. Any historical data regarding mortgage loan prepayment rates may not be indicative of the rate of future prepayments on the related HECMs, and no assurances can be given about the rates at which the related HECMs will prepay. We expect the rate of principal payments on the HECMs related to the participations underlying the trust assets to vary. Borrowers generally may prepay their HECMs at any time without penalty.

In addition to voluntary prepayments, HECMs can be prepaid as a result of governmental mortgage insurance claim payments, loss mitigation arrangements, repurchases or liquidations of defaulted HECMs. Although under certain circumstances Ginnie Mae issuers have the option to repurchase defaulted HECMs from the related pool underlying a Ginnie Mae HECM MBS certificate, they are not obligated to do so. Defaulted HECMs that remain in pools backing Ginnie Mae HECM MBS certificates may be subject to governmental mortgage insurance claim payments, loss mitigation arrangements or foreclosure, which could have the same effect as voluntary prepayments on the cash flow available to pay the securities.

A catastrophic weather event, pandemic or other natural disaster may affect the rate of principal payments, including prepayments, on the related HECMs. Any such event may damage the related mortgaged properties that secure the HECMs or may lead to a general economic downturn in the affected regions, including job losses and declines in real estate values. A general economic downturn may increase the rate of defaults on the HECMs in such areas resulting in prepayments on the HECMs related to the participations underlying the trust assets due to governmental mortgage insurance claim payments, loss mitigation arrangements, repurchases or liquidations of defaulted HECMs. Insurance payments on damaged or destroyed homes may also lead to prepayments

on the related HECMs. Further, in connection with presidentially declared major disasters, Ginnie Mae may authorize optional special assistance to issuers, including expanded buyout authority which allows issuers, upon receiving written approval from Ginnie Mae, to repurchase eligible HECMs from the related pool underlying a Ginnie Mae MBS certificate, even if such HECMs do not otherwise meet the standard conditions for removal or repurchase.

No assurances can be given as to the timing or frequency of any governmental mortgage insurance claim payments, issuer repurchases, loss mitigation arrangements or foreclosure proceedings with respect to defaulted HECMs and the resulting effect on the timing or rate of principal payments on your securities.

It is uncertain when payments will be made in respect of securities backed by HECM MBS.

The rate of voluntary prepayments and the occurrence of maturity events and Ginnie Mae issuer purchase events with respect to HECMs are uncertain. A borrower may prepay in whole or in part the outstanding balance of a HECM at any time without penalty, including any accrued interest thereon. No interest or principal is required to be paid by the borrower, however, until maturity, which generally occurs upon the occurrence of a maturity event, which may be deferred under certain circumstances. A Ginnie Mae issuer of a HECM MBS is obligated to purchase, under certain circumstances, all participations related to a HECM.

It is uncertain when any amounts might be paid on securities backed by HECM MBS because it is uncertain (i) whether a HECM borrower will choose to prepay amounts advanced in whole or in part, (ii) when any maturity event might occur, whether that maturity event will be deferred and, if so, the extent of the deferral, and (iii) when any Ginnie Mae issuer purchase event might occur, and thus the yields on and weighted average lives of securities backed by HECM MBS may differ substantially from an investor's expectations. See "Risk Factors" and "Prepayment and Yield Considerations" in the HECM MBS Base Prospectus and "Yield, Maturity and Prepayment Considerations" in this supplement.

From time to time FHA and the residential mortgage industry make changes to the requirements, procedures and related fees for originating, refinancing and servicing HECMs. Any of these changes may result in HECM MBS backed by participations related to HECMs subject to different underwriting or servicing requirements or procedures. Such changes may impact borrower prepayment, delinquency, refinance and mortgage insurance claim rates and may influence the decision by a Ginnie Mae issuer whether to exercise any optional Ginnie Mae issuer purchase event.

The enforceability of some HECM maturity event clauses may be uncertain. HECMs contain clauses defining maturity events. The clauses in some HECMs permit the issuer to declare the HECM due and payable upon the death of the last surviving borrower. Litigation by surviving non-borrower spouses may interfere with or affect the ability of the issuer to realize upon the collateral. The inability to enforce a due-on-death clause may affect the weighted average lives and the yields realized by investors in the securities.

Rates of principal payments can reduce your yield. The yield on your securities probably will be lower than you expect if:

- you bought your securities at a premium (interest only securities, for example) and principal payments are faster than you expected, or
- you bought your securities at a discount and principal payments are slower than you expected.

In addition, if your securities are interest only securities or securities purchased at a significant premium, you could lose money on your investment if prepayments occur at a rapid rate.

HECM borrowers may choose from various payment plans, each of which has different prepayment characteristics that may affect the weighted average lives and yields of the securities. For example, line of credit payment plans may experience higher prepayment rates than other payment plans. To the extent that the HECMs include a large concentration of line of credit HECMs, such HECMs may experience higher prepayment rates. Higher prepayment rates will reduce, perhaps significantly, the weighted average lives of the securities. Reductions in the weighted average lives of the securities will affect

the yields on the securities. HECM borrowers may have the ability to change to another available payment plan at any time as long as the change complies with the FHA requirements in effect. See *“The Trust Assets — The Participations and the HECMs”* in this supplement.

A HECM that has been drawn up to its principal limit, or becomes drawn up to its principal limit early in its term, could result in a reduction of the weighted average lives of and yields on the related securities. A borrower’s principal limit for a HECM represents the maximum disbursement that the borrower can receive under the HECM and is calculated, in part, on the basis of the maximum claim amount for such HECM. The borrower’s access to the principal limit may be restricted by the FHA loan origination requirements applicable to the related HECM. The maximum claim amount for a HECM generally represents the lender’s maximum insurance claim from HUD for such HECM. A HECM with a loan balance that is approaching or has reached its principal limit, or that is fully drawn early in its term, is likely to reach its maximum claim amount sooner than a HECM with significant remaining credit availability that is drawn over an extended period of time. When a HECM approaches its maximum claim amount, a mandatory purchase event or a 98% optional purchase event may occur. If a purchase of all participations relating to a HECM occurs under such a Ginnie Mae issuer purchase event, the purchase will result in a payment in respect of the related securities and will reduce the weighted average lives of such securities. Reductions in the weighted average lives of the securities will affect, perhaps significantly, the yields on the securities.

The WACR of the group 2 trust assets may limit the amount of interest distributed to or accrued on the related floating rate and notional class. The interest entitlements of Class BF is capped at the WACR of the related trust assets. If the WACR of the group 2 trust assets is equal to or lower than the interest rate on the related floating rate class based on the interest rate formula as shown under “Terms Sheet — Interest Rates” in this supplement for any accrual period, interest entitlements with respect to Class IB may be reduced to zero because such class is entitled to receive the excess of interest accrued in respect of the related trust assets over the interest accrued on the related floating rate class. In addition, if the WACR of the group 2 trust assets is lower than the interest rate on Class BF

based on its interest rate formula as shown under “Terms Sheet — Interest Rates” in this supplement for any accrual period, interest accruing on such floating rate class will be reduced because the interest rate on such class is capped at a rate equal to the WACR of the related trust assets.

The Underlying Certificate WACR of the subgroup 5B, 5C, 6A, 6B and 6C trust assets may limit the amount of interest distributed to or accrued on the related floating rate and notional classes or components. The interest entitlements of Classes FB and FC, as applicable, may be reduced because certain components of such classes are capped at the Underlying Certificate WACR or the Underlying Certificate WACR less a fixed amount of the related trust assets, which are underlying certificates. In turn, the interest entitlements of the underlying certificates included in trust asset subgroups 5B, 5C, 6A and 6B are capped at the WACR of their related underlying trust assets and the interest entitlement of the underlying certificate included in trust asset subgroup 6C is capped at the lesser of a related maximum rate and the WACR of its related underlying trust assets, in each case as described in the related underlying certificate disclosure document. If the Underlying Certificate WACR or the Underlying Certificate WACR less a fixed amount of the subgroup 5B, 5C, 6A, 6B or 6C trust asset is equal to or lower than the interest rates on the related floating rate class or component based on the interest rate formula as shown under “Terms Sheet — Interest Rates” in this supplement for any accrual period, interest entitlements with respect to Classes BI and IC, as applicable, may be reduced because the components of such class are entitled to receive the excess of interest accrued in respect of the related trust assets over the interest accrued on the related floating rate classes or components. In addition, if the Underlying Certificate WACR of (i) the subgroup 5B, 5C, 6A or 6B trust asset is lower than the interest rate on components FB1, FB2, FC2 or FC3, as applicable, based on its related interest rate formula as shown under “Terms Sheet — Interest Rates” in this supplement for any accrual period, interest accruing on such floating rate component will be reduced because the interest rate on such component is capped at a rate less than the Underlying Certificate WACR of the related trust asset and (ii) the subgroup 6C trust asset is lower than the interest rate on component FB3 based on its related interest rate formula as shown under “Terms Sheet — Interest Rates” in this supplement for any accrual period,

interest accruing on such floating rate component will be reduced because the interest rate on such component is capped at a rate equal to the Underlying Certificate WACR of the related trust asset.

The levels of any interest rate indices applicable to the group 3 through 17 Trust Assets or securities will affect payments and yields on the group 3 through 17 securities. If any interest rate index applicable to the group 3 through 17 Trust Assets or the securities performs differently from what you expect, the yield on your securities may be lower than you expect. Lower levels of any applicable interest rate index may reduce the yield on floating rate securities. You should bear in mind that the timing of changes in any applicable interest rate index may also affect your yield: generally the earlier a change in an applicable interest rate index occurs, the greater the effect such change will have on your yield. It is doubtful that any applicable interest rate index will remain constant.

In addition, higher levels of any interest rate index applicable to adjustable rate HECMs will increase the rate at which such HECMs reach their maximum claim amounts. When a HECM approaches its maximum claim amount, certain Ginnie Mae issuer purchase events could occur resulting in a prepayment in respect of the related securities and reductions in the weighted average lives of the related securities. Reductions in the weighted average lives of the securities will affect, perhaps significantly, the yields on the securities.

The applicable interest rate indices for the group 3 through 17 Trust Assets and securities are identified under “Terms Sheet — Trust Assets” and “— Interest Rates” in this supplement.

Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities. If the applicable interest rate indices increase to a sufficiently high level, the interest rates on the adjustable rate HECMs related to the participations directly or indirectly underlying the group 3 through 17 trust assets may be limited by caps. As a result, the WACR on the related HECM MBS, as well as the interest rates on the related securities, may be limited. The application of any caps on the adjustable rate HECMs may significantly impact the interest rates on the interest only classes or components in groups 3

through 17 because the interest entitlement of such classes or components of securities is entirely dependent on the WACR or Underlying Certificate WACR of the related trust asset group or subgroup.

The maximum rate on each floating rate class or component could limit the amount of interest that accrues on such class or component. Each of Components FB1, FB2, FC1, FC2 and FC3 is subject to a maximum rate which is equal to the related maximum rate set forth under “Terms Sheet — Interest Rates” for that component, which is less than the WACR or Underlying Certificate WACR for the related trust asset subgroup. If 30-day Average SOFR exceeds certain levels, the interest rate on each of Components FB1, FB2, FC1, FC2 and FC3 may be capped at the related maximum rate set forth under “Terms Sheet — Interest Rates” for that class, even in instances when such rate is less than the WACR or Underlying Certificate WACR for the related trust asset subgroup. The maximum rate on Class F is limited by the interest accrued on its related REMIC classes. If 30-day Average SOFR exceeds certain levels, the interest rate on Class F will be capped to the extent that the interest rates on its related REMIC classes are capped as described in the next sentence. Each Floating Rate Class or Component (other than Class F and Components FB1, FB2, FC1, FC2 and FC3) is subject to a maximum rate that is equal to the WACR or Underlying Certificate WACR for the related trust asset group or subgroup.

The mortgage interest rate indices for the HECMs related to the participations directly or indirectly underlying the group 3 through 6 and 9 through 17 trust assets are different than the interest rate index for the related securities, which may impact, perhaps significantly, the amount of interest distributable to the group 3 through 6 and 9 through 17 securities after any applicable initial fixed rate period of the related HECMs. Because of the differences in how, when and how often the applicable interest rate indices for such HECMs are determined compared to how, when and how often the related securities interest rate index is determined, there may be a mismatch between the interest rates on the group 3 through 6 and 9 through 17 trust assets and the interest rates on the related securities. In addition, the HECMs related to the group 3 through 6 and 9 through 17 trust assets may have

different monthly or annual interest rate adjustment dates, which may affect the WACR of the related HECM MBS and the interest entitlements of the group 3 through 6 and 9 through 17 trust assets and may magnify the difference between the WACR of the group 3 through 6 and 9 through 17 trust assets and the interest rates on the related securities.

If the applicable interest rate indices for such HECM MBS is lower than the related securities interest rate index for any accrual period, interest accruals with respect to the related notional class or component may be reduced because such notional class or component is entitled to receive the excess of interest accrued in respect of the related trust assets, as applicable, over the interest distributable to the related floating rate class, classes or components. In addition, if the applicable interest rate indices for such HECMs are significantly lower than the related securities interest rate index for any accrual period, interest accruing on the related floating rate class, classes or components may be reduced because the interest rate on such floating rate class, classes or components is capped at a rate equal to the WACR or Underlying Certificate WACR of the related trust assets. In the event that the applicable interest rate indices for such HECMs are higher than the related securities interest rate index, interest accruing on the related floating rate class, classes or components may not be affected but interest accruals with respect to the related notional class will be increased.

An investment in the securities is subject to significant reinvestment risk. The rate of principal payments on your securities is uncertain. You may be unable to reinvest the payments on your securities at the same returns provided by the securities. Lower prevailing interest rates may result in an unexpected return of principal. In that interest rate climate, higher yielding reinvestment opportunities may be limited. Conversely, higher prevailing interest rates may result in slower returns of principal and you may not be able to take advantage of higher yielding investment opportunities. The final payment on your security may occur much earlier than the final distribution date.

The rate of reduction or increase in the principal or notional balance of the underlying certificates will directly affect the rate of reduction or increase in the principal and

notional balances of the group 5 through 8 securities. The underlying certificates will be sensitive to the rate of payments of principal (including prepayments) of the related HECMs. This supplement contains no information as to whether the underlying certificates have performed as originally anticipated. Additional information as to the underlying certificates may be obtained by performing an analysis of the current class factors of the underlying certificates in light of applicable information contained in the underlying certificate disclosure documents.

An investment in the group 2 through 17 securities entails risks not associated with an investment in conventional fixed rate securities or securities linked to established market indices. The Federal Reserve Bank of New York began to publish SOFR in April 2018 and compounded averages of SOFR in March 2020. Although the Federal Reserve Bank of New York has also published historical indicative SOFR from August 2014 to March 2018, such pre-publication data necessarily involves assumptions, estimates and approximations. You should not rely on any historical changes or trends in SOFR as an indicator of future changes in SOFR. Daily shifts in SOFR have been, and may in the future be, greater than those in comparable market indices. Because the interest rate applicable to any accrual period for securities with an interest rate based on 30-day Average SOFR will be calculated by reference to the daily rates of SOFR during an approximate 30-day period commencing and ending before the related accrual period as described under “Description of the Securities — Interest Distributions — Floating Rate Classes” in this supplement, the return on and value of the group 2 through 17 securities may fluctuate more than debt securities linked to less volatile indices.

30-day Average SOFR and CME Term SOFR are relatively new market indices and the group 2 through 17 securities will likely have no established trading market when issued, and an established trading market may never develop or, if developed, may not be liquid. Market terms for securities indexed to 30-day Average SOFR or CME Term SOFR may evolve over time, and trading prices of some securities indexed to 30-day Average SOFR or CME Term SOFR may be lower than those of later-issued securities as a result. Similarly, if 30-day Average SOFR or CME Term SOFR does not prove to be widely used in similar securities, the trading price of related SOFR-Based

Classes may be lower than those of securities linked to indices that are more widely used. Investors in SOFR-Based Classes may not be able to sell their securities at all or may not be able to sell their securities at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

You should consult your own financial and legal advisors about the risks associated with an investment in the group 2 through 17 securities and the suitability of investing in the group 2 through 17 securities in light of your particular circumstances.

Interest on the floating rate securities will be determined using a replacement rate if 30-day Average SOFR is no longer available, which could adversely affect the value of your investment in the group 2 through 6 and 9 through 17 securities. 30-day Average SOFR is published by the Federal Reserve Bank of New York based on data received from other sources, and neither Ginnie Mae nor the trustee has any control over its determination, calculation or publication. The activities of the Federal Reserve Bank of New York may directly affect prevailing 30-day Average SOFR in unpredictable ways. There can be no guarantee that 30-day Average SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of holders of securities indexed to 30-day Average SOFR. If the manner in which 30-day Average SOFR is calculated is changed or if 30-day Average SOFR is discontinued, that change or discontinuance may result in a reduction of the amount of interest payable on applicable SOFR-Based Classes and the trading prices of such Classes.

The Federal Reserve Bank of New York has noted that it may alter the methods of calculation, publication schedule, rate revision practices or availability of 30-day Average SOFR at any time without notice. There can be no assurance that 30-day Average SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in the group 2 through 6 and 9 through 17 securities.

If 30-day Average SOFR is no longer published or cannot be used, the amount of interest payable on the floating rate securities will be determined using a replacement rate, as described under “Description of the Securities — Interest Rate Indices — Benchmark Replacement” in the Base

Offering Circular. Ginnie Mae will have the sole discretion to make conforming changes in connection with any replacement rate without the consent of security holders or any other party, as described under “Description of the Securities — Interest Rate Indices — Benchmark Replacement” in the Base Offering Circular. This could reduce the amount of interest payable on the floating rate securities, which could adversely affect the return on, value of, and market for, the group 2 through 6 and 9 through 17 securities. Furthermore, there can be no assurance that the characteristics of any replacement rate will be similar to 30-day Average SOFR or that any replacement rate will produce the economic equivalent of 30-day Average SOFR.

The securities may not be a suitable investment for you. The securities, especially the group 5, 6, 7 and 8 securities and, in particular, the interest only, component and residual classes, are not suitable investments for all investors.

In addition, although the sponsor intends to make a market for the purchase and sale of the securities after their initial issuance, it has no obligation to do so. There is no assurance that a secondary market will develop, that any secondary market will continue, or that the price at which you can sell an investment in any class will enable you to realize a desired yield on that investment.

You will bear the market risks of your investment. The market values of the classes are likely to fluctuate. These fluctuations may be significant and could result in significant losses to you.

The secondary markets for mortgage-related securities have experienced periods of illiquidity and can be expected to do so in the future. Illiquidity can have a severely adverse effect on the prices of classes that are especially sensitive to prepayment or interest rate risk or that have been structured to meet the investment requirements of limited categories of investors.

The residual securities may experience significant adverse tax timing consequences. Accordingly, you are urged to consult tax advisors and to consider the after-tax effect of ownership of a residual

security and the suitability of the residual securities to your investment objectives. See “*Certain United States Federal Income Tax Consequences*” in this supplement and in the Base Offering Circular.

You are encouraged to consult advisors regarding the financial, legal, tax and other aspects of an investment in the securities. You should not purchase the securities of any class unless you understand and are able to bear the prepayment, yield, liquidity and market risks associated with that class.

The actual characteristics of the HECMs and the participations underlying the trust assets and the underlying certificates affect the weighted average lives and yields of your securities. The yield and decrement tables in this supplement are based on assumed characteristics that are likely to be different from the actual characteristics. Furthermore, certain of the assumed characteristics identified in Exhibits A and E to this supplement, such as maximum claim amount and HECM MBS or Ginnie Mae Platinum Certificate principal balance, are calculated on an aggregate basis which may cause results to differ, perhaps significantly, from those calculated using the actual characteristics of the trust assets on a HECM or participation level basis. As a result, the yields on your securities could be lower than you expected, even if the HECMs prepay at the constant prepayment rates set forth in the applicable table.

It is highly unlikely that the HECMs will prepay at any of the prepayment rates assumed or draw at any of the draw rates assumed, if any, in this supplement, or at any constant rate.

Lack of publicly available information on the HECMs and the related participations underlying the trust assets may adversely affect the liquidity of your securities. Limited information will be made publicly available regarding the performance of the HECMs and the related participations underlying the trust assets after the closing date. The absence of publicly available information may affect your ability to sell your securities to prospective investors.

THE TRUST ASSETS

General

The Sponsor intends to acquire the Trust Assets in privately negotiated transactions prior to the Closing Date and to sell them to the Trust according to the terms of a Trust Agreement between the Sponsor and the Trustee. The Sponsor will make certain representations and warranties with respect to the Trust Assets. All Trust Assets, regardless of whether the assets consist of Trust MBS or the Underlying Certificates, will evidence, directly or indirectly, Ginnie Mae Certificates.

The Trust MBS (Groups 1 through 4 and 9 through 17 and Subgroup 5A)

The Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets are HECM MBS or Ginnie Mae Platinum Certificates backed by HECM MBS guaranteed by Ginnie Mae, and are based on or backed by Participations in advances made to borrowers and related amounts in respect of HECMs. Each such HECM MBS will accrue interest at the interest rate for that HECM MBS for each accrual period (the “HECM MBS Rate”) as set forth in the related HECM MBS Disclosure Documents. The HECM MBS Rate is generally equal to the weighted average of the interest rates on the Participations (each, the “Participation Interest Rate”).

The interest rate of HECM MBS backed by Participations related to adjustable rate HECMs may be limited by caps on the adjustable rate HECMs. *See “Risk Factors — Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities” in this Supplement.*

With respect to each Participation, the Participation Interest Rate generally equals the interest rate of the related HECM less the Servicing Fee Margin. The Servicing Fee Margin generally represents the amount of the servicing compensation payable to the Ginnie Mae Issuer and the Ginnie Mae guaranty fee. However, the Servicing Fee Margin may vary depending on the Issue Date of the HECM MBS and whether the servicing compensation for the HECM is paid on a flat monthly fee arrangement or as a portion of the mortgage interest rate.

Amounts accrued on each HECM MBS in respect of interest each month will equal the product of (i) one-twelfth of the HECM MBS Rate and (ii) the unpaid and outstanding principal amount of such HECM MBS at the end of the prior month. Each month the accrued interest with respect to each HECM MBS will be added to the then outstanding principal balance of such HECM MBS. There are no scheduled payments of interest. It is generally anticipated that no payment in respect of any HECM MBS will be paid until the occurrence of a Maturity Event, which may be deferred in certain circumstances, or in the event that a borrower makes a voluntary prepayment in whole or in part of the outstanding principal balance of the related HECM or a Ginnie Mae Issuer purchase event occurs.

The HECM MBS Disclosure Documents or Platinum Certificate Disclosure Documents may be obtained from the Information Agent as described under “Available Information” in this Supplement. Investors are cautioned that material changes in facts and circumstances may have occurred since the date of the HECM MBS Disclosure Documents or Platinum Certificate Disclosure Documents, including changes in prepayment rates, prevailing interest rates and other economic factors, which may limit the usefulness of, and be directly contrary to the assumptions used in preparing the information included in, the offering document.

Ginnie Mae Platinum Program. Under the Ginnie Mae Platinum Program, the holder of a number of Ginnie Mae I Certificates or Ginnie Mae II Certificates may deposit those certificates into a trust, and in each case, the depositor will receive a larger denominated Ginnie Mae Platinum Certificate. If the Ginnie Mae I Certificates or Ginnie Mae II Certificates deposited bear a fixed rate of interest, then all certificates (other than HECM MBS) deposited must bear the same fixed rate. Fixed rate HECM MBS may be combined with other fixed rate HECM MBS in exchange for a Ginnie Mae Platinum Certificate that bears interest at the weighted average coupon of the deposited HECM MBS. Adjustable rate Ginnie Mae II Certificates may be combined with other adjustable rate Ginnie Mae II Certificates with the same index and periodic and lifetime caps, but without regard to interest rate or payment adjustment dates, in exchange

for a Ginnie Mae Platinum Certificate that bears interest at the weighted average coupon of the deposited Ginnie Mae II Certificates. For purposes of the Base Offering Circular and this Offering Circular Supplement, (a) the term “Ginnie Mae I Certificate” means a Ginnie Mae I MBS Certificate or a Ginnie Mae Platinum Certificate backed by Ginnie Mae I MBS Certificates, and (b) the term “Ginnie Mae II Certificate” means a Ginnie Mae II MBS Certificate or a Ginnie Mae Platinum Certificate backed by Ginnie Mae II MBS Certificates.

The Participations and the related HECMs are further described in the tables in the Terms Sheet hereof and in Exhibit A to this Supplement. Exhibit A also sets forth information regarding approximate loan ages of the related HECMs and weighted average information regarding various characteristics of the HECMs relating to the Participations underlying the related HECM MBS.

The Underlying Certificates (Groups 6 through 8 and Subgroups 5B and 5C)

The Group 6 through 8 and Subgroup 5B and 5C Trust Assets are Underlying Certificates that represent beneficial ownership interests in separate trusts, the assets of which evidence direct or indirect beneficial ownership interests in certain Ginnie Mae Certificates. Each Underlying Certificate constitutes all or a portion of a class of a separate Series of certificates described in the related Underlying Certificate Disclosure Documents. Each Underlying Certificate Disclosure Document may be obtained from ginniemae.gov or the Information Agent as described under “Available Information” in this Supplement. Investors are cautioned that material changes in facts and circumstances may have occurred since the date of each Underlying Certificate Disclosure Document, including changes in prepayment rates, prevailing interest rates and other economic factors, which may limit the usefulness of, and be directly contrary to the assumptions used in preparing the information included in, such offering document. See *“Underlying Certificates” in the Base Offering Circular*.

Each Underlying Certificate provides for monthly distributions and is further described in the tables contained in Exhibits D and E to this Supplement. The tables also set forth information regarding the approximate weighted average HECM age and gross coupon of the HECMs underlying each Underlying Certificate.

The Participations and the HECMs

The Participations and the related HECMs underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets are expected to have, on a weighted average basis, the characteristics set forth in Exhibit A and the general characteristics described in the Base Offering Circular and the HECM MBS Disclosure Documents. The Participations and the related HECMs underlying the Underlying Certificates are expected to have, on a weighted average basis, the characteristics set forth in Exhibits D and E to this supplement. The Participations are related to interests in advances made to borrowers and related amounts in respect of first lien, single-family, fixed rate and adjustable rate residential HECM loans insured by the Federal Housing Administration. See *“The Ginnie Mae Certificates — General” in the Base Offering Circular*.

HECM borrowers may choose from various payment plans, which may be limited or influenced by the characteristics of their particular HECM. These characteristics include, among other things, the value of the mortgaged property, the amount disbursed to the HECM borrower at closing, the age of the HECM borrower and in certain cases the age of any non-borrowing spouse, and the type of interest rate selected by the HECM borrower at closing. HECM borrowers may have the ability to change to another available payment plan at any time as long as the change complies with FHA requirements. The “single disbursement lump sum” payment plan allows a single draw at closing of up to a specified percentage of the principal limit of the HECM plus subsequent disbursements after closing for set-asides. The “tenure” payment plan guarantees that the borrower will receive equal monthly payments for so long as the property remains the borrower’s principal residence. The “term” payment plan guarantees that the borrower will receive monthly payments for a fixed term of months as selected by the borrower. The “line of credit” payment plan allows the borrower to draw up to the available line of credit and in amounts of the borrower’s choosing. The “modified tenure” payment plan allows the borrower to set aside a portion of loan proceeds as a line of credit and receive the remaining balance in the form of equal monthly payments. The “modified term” payment plan allows the borrower to set aside a portion of the loan proceeds as a line of

credit and receive the remaining balance as equal monthly payments for a fixed period of time selected by the borrower. Each payment plan is designed so that no repayments of principal or interest are required until a Maturity Event occurs, which may be deferred in certain circumstances. Any HECM may be pre-paid in whole or in part at any time without penalty under each of the payment plans. See *“Risk Factors — HECM borrowers may choose from various payment plans, each of which has different prepayment characteristics that may affect the weighted average lives and yields of the securities”* in this Supplement.

Each monthly adjustable rate HECM MBS is backed by Participations related to adjustable rate HECMs with interest rates that adjust (i) on a monthly basis, (ii) in the month immediately following the issuance of the related HECM MBS and (iii) on the same interest rate adjustment date equal to the first day of the month. Each annual adjustable rate HECM MBS is backed by Participations related to adjustable rate HECMs with interest rates that adjust (i) on an annual basis, (ii) within twelve (12) months following the issuance of the related HECM MBS and (iii) notwithstanding anything to the contrary in the HECM MBS Disclosure Documents, on the same or different interest rate adjustment dates. See *“Risk Factors — The mortgage interest rate indices for the HECMs related to the participations directly or indirectly underlying the group 3 through 6 and 9 through 17 trust assets are different than the interest rate index for the related securities, which may impact, perhaps significantly, the amount of interest distributable to the group 3 through 6 and 9 through 17 securities after any applicable initial fixed rate period of the related HECMs”* in this Supplement.

Specific information regarding the individual characteristics of the Participations and the related HECMs is not available. For purposes of this Supplement, certain assumptions have been made regarding the characteristics of the Participations and the related HECMs. However, the actual characteristics of many of the Participations and the related HECMs will differ from the characteristics assumed, perhaps significantly. This will be the case even if the weighted average characteristics of the Participations and the related HECMs are the same as the assumed characteristics. Small differences in the characteristics of the Participations and the related HECMs can have a significant effect on the Weighted Average Lives and yields of the Securities. See *“Terms Sheet — Assumed Characteristics of the HECMs and the Participations Underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets,” “Terms Sheet — Assumed Characteristics of the HECMs and the Participations Underlying the Group 6 through 8 and Subgroup 5B and 5C Underlying Certificates,” “Risk Factors,” “Yield, Maturity and Prepayment Considerations”* and Exhibits A and E in this Supplement.

The Trustee Fee

The Sponsor will contribute certain Ginnie Mae Certificates in respect of the Trustee Fee. On each Distribution Date, the Trustee will retain all principal and interest distributions received on such Ginnie Mae Certificates in payment of the Trustee Fee.

GINNIE MAE GUARANTY

The Government National Mortgage Association (“Ginnie Mae”), a wholly-owned corporate instrumentality of the United States of America within HUD, guarantees the timely payment of principal and interest on the Securities. The General Counsel of HUD has provided an opinion to the effect that Ginnie Mae has the authority to guarantee multiclass securities and that Ginnie Mae guaranties will constitute general obligations of the United States, for which the full faith and credit of the United States is pledged. See *“Ginnie Mae Guaranty” in the Base Offering Circular*.

DESCRIPTION OF THE SECURITIES

General

The description of the Securities contained in this Supplement is not complete and is subject to, and is qualified in its entirety by reference to, all of the provisions of the Trust Agreement. See *“Description of the Securities” in the Base Offering Circular*.

Form of Securities

Each Class of Securities other than the Residual Securities initially will be issued and maintained, and may be transferred only on the Fedwire Book-Entry System. Beneficial Owners of Book-Entry Securities will ordinarily hold these Securities through one or more financial intermediaries, such as banks, brokerage firms and securities clearing organizations that are eligible to maintain book-entry accounts on the Fedwire Book-Entry System. By request accompanied by the payment of a transfer fee of \$25,000 per Certificated Security to be issued, a Beneficial Owner may receive a Regular Security in certificated form.

The Residual Securities will not be issued in book-entry form but will be issued in fully registered, certificated form and may be transferred or exchanged, subject to the transfer restrictions applicable to Residual Securities set forth in the Trust Agreement, at the Corporate Trust Office of the Trustee. See *“Description of the Securities — Forms of Securities; Book-Entry Procedures” in the Base Offering Circular*.

Each Regular and MX Class will be issued in minimum dollar denominations of initial principal or notional balance of \$100,000 and integral multiples of \$1 in excess of \$100,000.

Distributions

Distributions on the Securities will be made on each Distribution Date as specified under “Terms Sheet — Distribution Date” in this Supplement. On each Distribution Date for a Security, or in the case of the Certificated Securities, on the first Business Day after the related Distribution Date, the applicable Available Distribution Amount will be distributed to the related Holders of record as of the related Record Date. Beneficial Owners of Book-Entry Securities will receive distributions through credits to accounts maintained for their benefit on the books and records of the appropriate financial intermediaries. Holders of Certificated Securities will receive distributions by check or, subject to the restrictions set forth in the Base Offering Circular, by wire transfer. See *“Description of the Securities — Distributions” and “— Method of Distributions” in the Base Offering Circular*.

Interest Distributions

The Interest Distribution Amount will be distributed or accrued as described under “Terms Sheet — Distributions” in this Supplement.

- Interest will be calculated on the basis of a 360-day year consisting of twelve 30-day months.
- Interest distributable or accrued on any Class for any Distribution Date will consist of 30 days’ interest on its Class Principal Balance (or Class Notional Balance) as of the related Record Date.

Categories of Classes and Components

For purposes of interest distributions, the Classes will be categorized as shown under “Interest Type” on the front cover of this Supplement and on Schedule I to this Supplement, and Components will be categorized as shown above under “Terms Sheet — Component Classes” in this Supplement. The

abbreviations used in this Supplement to describe the interest entitlements of the Classes are explained under “Class Types” in Appendix I to the Base Offering Circular.

Accrual Period

The Accrual Period for each Regular and MX Class is set forth in the table below:

Class	Accrual Period
Delay Classes	The calendar month preceding the related Distribution Date
Floating Rate Classes and Classes B, EI, HI, IG, IH, IJ, IL, IM, LI and MI	From the 20 th day of the month preceding the month of the related Distribution Date through the 19 th day of the month of that Distribution Date

Floating Rate Classes

The Floating Rate Classes will bear interest as shown under “Terms Sheet — Interest Rates” in this Supplement.

The Interest Rate for the Floating Rate Classes and Components will be based on 30-day Average SOFR. The Trustee or its agent will determine 30-day Average SOFR as described under “Description of the Securities — Interest Rate Indices — Determination of 30-day Average SOFR” in the Base Offering Circular.

If 30-day Average SOFR ceases to be available or is no longer representative, a replacement rate will be selected, as described under “Description of the Securities — Interest Rate Indices — Benchmark Replacement” in the Base Offering Circular.

HECM MBS Weighted Average Coupon Classes

Each HECM MBS Weighted Average Coupon Class will bear interest as shown under “Terms Sheet — Interest Rates” in this Supplement.

The interest that will be distributed or accrued, as applicable, on each HECM MBS Weighted Average Coupon Class will be limited by the interest that is distributed or accrued in respect of the related Trust Assets. With respect to the Participations underlying the Group 3 through 17 Trust Assets, see “Risk Factors — Adjustable rate HECMs are subject to limitations on interest rate adjustments, which may limit the amount of interest payable in respect of the related HECM MBS and may limit the WACR on the related HECM MBS and the interest rates on the group 3 through 17 securities” in this Supplement and “Risk Factors — The mortgage interest rate indices for the HECMs related to the participations directly or indirectly underlying the group 3 through 6 and 9 through 17 trust assets are different than the interest rate index for the related securities, which may impact, perhaps significantly, the amount of interest distributable to the group 5B, 5C, 6A, 6B and 6C securities after any applicable initial fixed rate period of the related HECMs” in this Supplement. With respect to the Participations underlying the Group 2 Trust Assets, see “Risk Factors — The WACR of the group 2 trust assets may limit the amount of interest distributed to or accrued on the related floating rate and notional class” in this Supplement. With respect to the Participations underlying the Subgroup 5B, 5C, 6A, 6B and 6C Trust Assets, see “Risk Factors — The Underlying Certificate WACR of the subgroup 5B, 5C, 6A, 6B and 6C trust assets may limit the amount of interest distributed to or accrued on the related floating rate and notional classes” in this Supplement.

The Trustee’s determination of 30-day Average SOFR and its calculation of the Interest Rates will be final except in the case of clear error. Investors can obtain 30-day Average SOFR levels and Interest Rates for the current and preceding Accrual Periods from ginniemae.gov or by calling the Information Agent at (800) 234-GNMA.

HECM MBS Accrual Classes

Each of Classes A, AF, BF, DF, FA, FB, FC, FD, FE, FH, FJ, FL, FM, GF, HF, JF, KF and LF is a HECM MBS Accrual Class. Interest will accrue on each HECM MBS Accrual Class or Component and be distributed as described under “HECM MBS Accrual Class” in Appendix II to the Base Offering Circular.

Deferred Interest Amounts

Any interest accrued and unpaid on a Notional Class or Component during the Accrual Period for any Distribution Date that is not distributed because of an insufficiency in the related Available Distribution Amount for such Distribution Date increases the related Deferred Interest Amount for such Notional Class or Component. Any such amounts distributable to the Holders of a Notional Class or Component will be paid no later than the Final Distribution Date of such Notional Class or Component.

Principal Distributions

Amounts distributable in respect of principal will be distributed to the Holders entitled thereto as described under “Terms Sheet — Distributions” in this Supplement. Investors can calculate the amount of principal to be distributed with respect to any Distribution Date by using the Class Factors published in the preceding and current months. See “— Class Factors” below.

Categories of Classes and Components

For purposes of principal distributions, the Classes will be categorized as shown under “Principal Type” on the front cover of this Supplement and on Schedule I to this Supplement, and Components will be categorized as shown above under “Terms Sheet — Component Classes” in this Supplement. The abbreviations used in this Supplement to describe the principal entitlements of the Classes are explained under “Class Types” in Appendix I to the Base Offering Circular.

Component Classes

Each of Classes BI, FB, FC and IC is a Component Class and has Components with the designations and characteristics shown under “Terms Sheet — Component Classes” in this Supplement. Components will not be separately issued or transferable.

Notional Classes

The Notional Classes will not receive principal distributions based on their Class Notional Balances. For convenience in describing interest distributions, the Notional Classes will have the original Class Notional Balances shown on the front cover of this Supplement and on Schedule I to this Supplement. The Class Notional Balances will be reduced or increased as shown under “Terms Sheet — Notional Classes” in this Supplement.

Residual Securities

The Residual Securities will represent the beneficial ownership of the Residual Interest in the related Issuing REMIC and the beneficial ownership of the Residual Interest in the related Pooling REMIC, as described in “Certain United States Federal Income Tax Consequences” in the Base Offering Circular. The Residual Securities have no Class Principal Balance and do not accrue interest. The Residual Securities will be entitled to receive the proceeds of the disposition of any assets remaining in the related Trust REMICs after the Class Principal Balance or Class Notional Balance of each Class of Regular Securities in the related Security Group or Groups has been reduced to zero. However, any remaining proceeds are not likely to be significant. The Residual Securities may not be transferred to a Plan Investor, a Non-U.S. Person or a Disqualified Organization.

Class Factors

The Trustee will calculate and make available for each Class of Securities, no later than the day preceding the Distribution Date, the factor (carried out to eight decimal places) that when multiplied by the Original Class Principal Balance (or original Class Notional Balance) of that Class, determines the Class Principal Balance (or Class Notional Balance) after giving effect to the distribution of principal to be made on the Securities (and any addition to the Class Principal Balance of a HECM MBS Accrual Class and, in the case of the Class B Securities, any addition resulting from an increase in the Class IE Deferred Interest Amount) or any addition to or reduction of Class Notional Balance on that Distribution Date (each, a “Class Factor”).

- The Class Factor for any Class of Securities for each month following the issuance of the Securities will reflect its remaining Class Principal Balance (or Class Notional Balance) after giving effect to any principal distribution (or addition to principal) to be made or any addition to or reduction of Class Notional Balance on the Distribution Date occurring in that month.
- The Class Factor for each Class for the month of issuance is 1.00000000.
- The Class Factors for the MX Classes and the Classes of REMIC Securities that are exchangeable for the MX Classes will be calculated assuming that the maximum possible amount of each Class is outstanding at all times, regardless of any exchanges that may occur.
- Investors may obtain current Class Factors on ginniemae.gov.

See “Description of the Securities — Distributions” in the Base Offering Circular.

Termination

The Trustee, at its option, may purchase or cause the sale of the Trust Assets and thereby terminate the Trust on any Distribution Date on which the aggregate of the Class Principal Balances of the Securities is less than 1% of the aggregate Original Class Principal Balances of the Securities. The exercise of this option may be influenced by a number of factors, including but not limited to, the value of the Trust Assets then remaining in the Trust and general market conditions. The Trustee will be entitled to retain all proceeds and any other amounts in excess of the termination price payable to the Securities under the Trust Agreement.

On any Distribution Date upon the Trustee’s determination that the REMIC status of any Trust REMIC has been lost or that a substantial risk exists that this status will be lost for the then current taxable year, the Trustee will terminate such Trust REMIC and any related Trust REMIC and retire the related Securities. For these purposes, the Trust REMICs and the Securities with corresponding numerical designations are related as follows:

Trust REMICs	Related Securities
Group 1 Issuing and Pooling REMICs	Group 1 Securities
Group 2 Issuing and Pooling REMICs	Group 2 Securities
Group 3 Issuing and Pooling REMICs	Group 3 Securities
Group 4 Issuing and Pooling REMICs	Group 4 Securities
Group 5 Issuing and Pooling REMICs	Group 5 Securities
Group 6 Issuing and Pooling REMICs	Group 6 Securities
Group 7 Issuing and Pooling REMICs	Group 7 Securities
Group 8 Issuing and Pooling REMICs	Group 8 Securities
Group 9 through 17 Issuing and Pooling REMICs	Group 9 through 17 Securities

Upon any termination of the Trust (or one or more related Trust REMICs), the Holder of any related outstanding Security (other than a Residual or Notional Class Security) will be entitled to receive that Holder’s allocable share of the Class Principal Balance of that Class plus any accrued and unpaid interest thereon at the applicable Interest Rate, and any Holder of any related outstanding Notional Class Security will be entitled to receive that Holder’s allocable share of any accrued and unpaid interest thereon at the applicable Interest Rate (including any related Deferred Interest Amount). The Residual Holders will be entitled to their pro rata share of any assets remaining in the related Trust REMICs after payment in full of the amounts described in the foregoing sentence. However, any remaining assets are not likely to be significant.

With respect to each of Security Groups 1, 2, 3, 4, 5, 6, 7 and 8, a Holder of all of the outstanding Regular Securities of such Security Group and the related Class of Residual Securities will have the right to purchase the related Trust Assets upon three Business Days’ notice (the “Notice Period”). The purchase will be for cash in an amount equal to (A)(i) the aggregate remaining principal balance, in the case of the Group 1, 2, 3, 4, 5 and 6 Securities, the aggregate of the 2016-H17 Class KI Deferred Interest Amount, the 2016-H23 Class NI Deferred Interest Amount and the 2017-H06 Class GI Deferred Interest Amount (as each

term is defined in the related Underlying Certificate Disclosure Document), in the case of the Group 7 Securities, or the aggregate of the 2019-H19 Class EI Deferred Interest Amount and the 2023-H23 Class EI Deferred Interest Amount (as each term is defined in the related Underlying Certificate Disclosure Document), in the case of the Group 8 Securities, of the Trust Assets of such Security Group, but in no event less than the aggregate outstanding principal amount, if any, plus Deferred Interest Amount, if any, of the Securities of such Security Group, plus (ii) accrued interest on the Securities of such Security Group, less (B) amounts on deposit in the related Trust REMICs, for distribution on the Securities of such Security Group, plus (C) a \$5,000 termination fee payable to the Trustee in connection with each Security Group to be terminated. After the Notice Period, and upon such purchase, the Trustee will terminate the related Trust REMICs. Upon such termination, the Trustee will distribute the cash proceeds of the sale of the related Trust Assets to the Holder of the related Securities (which distribution may be offset against amounts due on the sale of such assets), will cancel the Securities of the related Security Group and cause the removal from the Book-Entry Depository Account of all Classes of the related Security Group, will cancel the related Class of Residual Securities, and will credit the remaining Trust Assets in the related Security Group to the account of the surrendering Holder.

Notwithstanding anything to the contrary contained herein, no such termination will be allowed unless the Trustee and Ginnie Mae are provided, at no cost to either the Trustee or Ginnie Mae, an Opinion of Counsel, acceptable to the Trustee and Ginnie Mae, to the effect that such termination constitutes a “qualified liquidation” under the REMIC Provisions, including Section 860F(a)(4) of the Code, and such termination will not result in a disqualification of any Trust REMIC that is not terminated at such time or the imposition of any “prohibited transactions” or “contributions” tax under the REMIC Provisions on any Trust REMIC that is not terminated at such time.

Modification and Exchange

All or a portion of the Classes of REMIC Securities specified on the front cover may be exchanged for a proportionate interest in the related MX Class shown on Schedule I to this Supplement. Similarly, all or a portion of the related MX Class may be exchanged for proportionate interests in the related Classes of REMIC Securities. This process may occur repeatedly.

Each exchange may be effected only in proportions that result in the principal and interest entitlements of the Securities received being equal to the entitlements of the Securities surrendered.

A Beneficial Owner proposing to effect an exchange must notify the Trustee through the Beneficial Owner’s Book-Entry Depository participant. This notice must be received by the Trustee not later than two Business Days before the proposed exchange date. The exchange date can be any Business Day other than the last Business Day of the month. The notice must contain the outstanding principal or notional balances of the Securities to be included in the exchange and the proposed exchange date. The notice is required to be delivered to the Trustee by email to USBGNMATEam@USBank.com or in writing at its Corporate Trust Office at One Federal Street, 3rd Floor, Boston, MA 02110, Attention: Ginnie Mae REMIC Program Agency Group 2025-H05. The Trustee may be contacted by telephone at (617) 603-6451 and by fax at (617) 603-6644.

A fee will be payable to the Trustee in connection with each exchange equal to 1/32 of 1% of the outstanding principal balance or notional balance of the Securities surrendered for exchange (but not less than \$2,000 or more than \$25,000); provided, however, that no fee will be payable in respect of an interest only security unless all securities involved in the exchange are interest only securities. The fee must be paid concurrently with the exchange.

The first distribution on a REMIC Security or an MX Security received in an exchange will be made on the Distribution Date in the month following the month of the exchange. The distribution will be made to the Holder of record as of the Record Date in the month of exchange.

See “Description of the Securities — Modification and Exchange” in the Base Offering Circular.

YIELD, MATURITY AND PREPAYMENT CONSIDERATIONS

General

The prepayment experience of the HECMs will affect the Weighted Average Lives of and the yields realized by investors in the related Securities.

- The rate of principal payments (including prepayments or partial payments) of the HECMs relating to the Participations underlying the Securities and the Underlying Certificates depends on a variety of economic, geographic, social and other factors, including prevailing market interest rates, home values, HECM borrower mortality, qualifying non-borrowing spouse mortality, divorce rates, changes in the value of the mortgaged property, the HECM borrower's ability to draw down additional funds without refinancing, FHA guidelines regarding HECMs, servicing decisions and court imposed limits on the rights and remedies available to a Ginnie Mae Issuer under the HECMs, and will affect the Weighted Average Lives and yields realized by investors in the related Securities. HECMs may respond differently than traditional forward mortgage loans to the factors that influence prepayment.

With respect to the related Trust Assets, the occurrence of any of the following events with respect to a HECM related to the Participations underlying the related HECM MBS (each a "Maturity Event") will, subject to deferral in certain circumstances, result in the holders of the Securities being entitled to a distribution of principal:

- if a borrower dies and the property is not the principal residence of at least one surviving borrower,
- if a borrower conveys all of his or her title in the mortgaged property and no other borrower retains title to the mortgaged property,
- if the mortgaged property ceases to be the principal residence of a borrower for reasons other than death and the mortgaged property is not the principal residence of at least one surviving borrower,
- if a borrower fails to occupy the mortgaged property for a period of longer than 12 consecutive months because of physical or mental illness and the mortgaged property is not the principal residence of at least one other borrower, or
- if a borrower fails to perform any of its obligations under the HECM (for example, the failure of the borrower to make certain agreed upon repairs to the mortgaged property or the failure of the borrower to pay taxes and hazard insurance premiums).

Some HECMs may provide for the deferral of a Maturity Event when the last surviving borrower dies with a non-borrowing spouse who satisfies FHA qualifying attributes and ongoing requirements for deferral. This deferral ceases when the non-borrowing spouse fails to qualify or satisfy FHA requirements for deferral, at which point the Maturity Event is no longer deferred and the HECM will become due and payable in accordance with FHA procedures.

Generally, a HECM is not repaid immediately upon the occurrence of a Maturity Event, but continues to accrue interest until the liquidation of the related mortgaged property and the repayment of the HECM or the receipt of insurance proceeds from FHA. Any resulting shortfall to investors in the related Securities with respect to any Participations in the related HECM will be covered by Ginnie Mae pursuant to its guaranty of the Securities.

A Ginnie Mae Issuer is obligated to purchase all Participations related to a HECM when the outstanding principal amount of the related HECM is equal to or greater than 98% of the "Maximum Claim Amount," and a Ginnie Mae Issuer has the option to purchase all Participations related to a HECM to the extent that any borrower's request for an additional advance in respect of any HECM, if funded, together with the outstanding principal amount of the related HECM is equal to or greater than 98% of the "Maximum Claim Amount" or when a HECM becomes, and continues to be, due and payable in accordance with its terms, as applicable (any such purchase referred to herein as a "Ginnie Mae Issuer Purchase Event"). In connection with such repurchase, the Ginnie Mae Issuer will pay an amount (the "Release

Price”) equal to the outstanding principal amount of all of the Participations related to such HECMs, and Ginnie Mae will relinquish all right, title and interest it has in the HECMs and the related Participations. With respect to each Participation, the “outstanding principal amount” of such Participation is the original principal amount of such Participation as of the related Issue Date of the related HECM MBS, increased by the Accrued Interest with respect to such Participation and decreased by any payments made in respect of such Participation. For purposes of determining the Release Price, the “Accrued Interest” with respect to any Participation is the aggregate interest accrued, compounded on a monthly basis, allocable to the Participation at the related Participation Interest Rate for each month (in each case, after taking into account any payments made in reduction of such Participation) from and including the Issue Date through the last day of the reporting month (as such term is defined in the Ginnie Mae guaranty agreement for the related HECM MBS) in which the Participation is to be purchased. The Participations relating to the HECM must be purchased by the Ginnie Mae Issuer at the end of the reporting month in which the outstanding principal balance of the HECM equals or exceeds 98% of the Maximum Claim Amount for such HECM. The Release Price will be passed through to the related securityholders on the Distribution Date following the month in which such Ginnie Mae Issuer Purchase Event occurs.

Higher levels of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR or One-Year CMT, as applicable, and additional draws on HECMs will increase the rate at which the related HECMs will reach their Maximum Claim Amounts. Any payment in respect of the related Securities resulting from a Ginnie Mae Issuer Purchase Event will reduce the Weighted Average Lives of such Securities and will affect, perhaps significantly, the yields on such Securities.

The occurrence of voluntary prepayments by a borrower, Maturity Events and Ginnie Mae Issuer Purchase Events will accelerate the distribution of principal of the Securities. It is uncertain when any amounts might be paid on securities backed by Participations in HECMs because it is uncertain (i) whether a HECM borrower will choose to prepay amounts advanced in whole or in part, (ii) when any Maturity Event might occur and whether that Maturity Event will be deferred and (iii) when any Ginnie Mae Issuer Purchase Event might occur. Investors in the Securities are urged to review the discussion under “*Risk Factors — It is uncertain when payments will be made in respect of securities backed by HECM MBS*” in this Supplement and also the HECM MBS Disclosure Documents.

Under certain circumstances, the Trustee has the option to purchase the Trust Assets, thereby effecting early retirement of the Securities. See “*Description of the Securities — Termination*” in this Supplement.

Investors in the Group 5 through 8 Securities are urged to review the discussion under “*Risk Factors — The rate of reduction or increase in the principal or notional balance of the underlying certificates will directly affect the rate of reduction or increase in the principal and notional balances of the group 5 through 8 securities*” in this Supplement.

Final Distribution Date

The Final Distribution Date for each Class, which is set forth on the front cover of this Supplement or on Schedule I to this Supplement, is the latest date on which the related Class Principal Balance or Class Notional Balance will be reduced to zero. In the case of each Notional Class, the related Deferred Interest Amount will be reduced to zero no later than the Final Distribution Date for such Notional Class.

- The actual retirement of any Class may occur earlier than its Final Distribution Date.
- According to the terms of the Ginnie Mae Guaranty, Ginnie Mae will guarantee payment in full of the Class Principal Balance of each Class of Securities no later than its Final Distribution Date.

Modeling Assumptions

The tables that follow have been prepared on the basis of the characteristics of the Underlying Certificates and the following assumptions (the “Modeling Assumptions”), among others:

1. The HECMs and related Participations underlying the Group 1 through 4 and 9 through 17 and Subgroup 5A Trust Assets have the assumed characteristics shown in Exhibit A, and the HECMs and related Participations underlying the Group 6 through 8 and Subgroup 5B and 5C Trust Assets have the assumed characteristics shown in Exhibit E.

2. The HECMs prepay at the constant percentages of the prepayment curve (described below and in Exhibit B) shown in the related table.
3. Draw activity occurs on the first day of the month and payments on the HECMs occur on the last day of the month, whether or not a Business Day, commencing in February 2025.
4. Distributions, if any, on the Securities are always received on the 20th day of the month, whether or not a Business Day, commencing in March 2025.
5. A termination of the Trust, any Trust REMIC or any Underlying Trust does not occur.
6. The Closing Date for the Securities is February 28, 2025.
7. No expenses or fees are paid by the Trust other than the Trustee Fee, which is paid as described under “The Trust Assets — The Trustee Fee” in this Supplement.
8. Distributions on the Underlying Certificates are made as described in the Underlying Certificate Disclosure Documents.
9. HECM borrowers who have the ability to do so draw at the annualized draw rate determined in accordance with the constant percentages of the draw curve shown in Exhibit C (the “Draw Rate”). The Draw Rate (converted to an equivalent monthly factor) is applied to the Maximum Claim Amount.
10. If a mandatory Ginnie Mae Issuer Purchase Event occurs with respect to a HECM, the purchase of the related Participation timely occurs. No optional Ginnie Mae Issuer Purchase Events occur.
11. The initial Interest Rates on the Group 2 Securities will be based on the initial rates as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Group 2 fixed rate HECMs for the first Distribution Date is based on the information set forth in Exhibit A. The Interest Rates on the Group 2 Floating Rate Securities will adjust monthly. For purposes of the Group 2 decrement tables, on all Distribution Dates occurring after the first Distribution Date, the constant value shown of 30-day Average SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class.
12. The initial Interest Rates on the Group 3, 4 and 9 through 17 Securities will be based on the initial rates as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Group 3, 4 and 9 through 17 adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit A. The Interest Rates on the Group 3, 4 and 9 through 17 Floating Rate Securities will adjust monthly. For purposes of the Group 3, 4 and 9 through 17 decrement tables, in all periods on or subsequent to the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit A, the constant value shown of the applicable index shown in Exhibit A with respect to any such decrement table is used to calculate the interest rate with respect to the Group 3, 4 and 9 through 17 HECMs, while on all Distribution Dates occurring after the first Distribution Date, the constant value shown of the applicable index shown in the Terms Sheet with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class.
13. The initial Interest Rates on the Group 5 Securities will be based on the initial rates as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Subgroup 5A adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit A and the interest rate on the Subgroup 5B and 5C adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit E. The Interest Rates on the Group 5 Floating Rate Securities will adjust monthly. For purposes of the Group 5 decrement tables, in all periods on or subsequent to the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit A and Exhibit E, the constant value shown of One-Year CMT with respect to any such decrement table is used to calculate the interest rate with respect to the Group 5 HECMs, while on all Distribution Dates occurring after the first Distribution Date, the constant value shown of 30-day Average SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class and the Subgroup 5B and 5C Trust Assets.
14. The initial Interest Rate on the Group 6 Securities will be based on the initial rate as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Group 6 adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit E. For purposes

of the Group 6 decrement tables, in all periods on or subsequent to the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit E, the constant value shown of the applicable index shown in Exhibit E with respect to any such decrement table is used to calculate the interest rate with respect to the Group 6 HECMs, while on all Distribution Dates occurring after the first Distribution Date, the constant value shown of 30-day Average SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class and the Group 6 Trust Assets.

15. The initial Interest Rate on the Group 7 Securities will be based on the initial rate as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Group 7 adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit E. For purposes of the Group 7 decrement tables, in all periods on or subsequent to the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit E, the constant value shown of the applicable index shown in Exhibit E with respect to any such decrement table is used to calculate the interest rate with respect to the Group 7 HECMs, while on all Distribution Dates occurring after the first Distribution Date, the constant value shown of One-Month Adjusted CME Term SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class and the Group 7 Trust Assets.

16. The initial Interest Rate on the Group 8 Securities will be based on the initial rate as shown under “Terms Sheet — Interest Rates” in this Supplement; however, the interest rate on the Group 8 adjustable rate HECMs for the first Distribution Date is based on the information set forth in Exhibit E. For purposes of the Group 8 decrement tables, in all periods on or subsequent to the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit E, the constant value shown of the applicable index shown in Exhibit E with respect to any such decrement table is used to calculate the interest rate with respect to the Group 8 HECMs, while on all Distribution Dates occurring after the first Distribution Date, the constant value shown of (1) One-Month Adjusted CME Term SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the Subgroup 8A Trust Asset, (2) 30-day Average SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the Subgroup 8B Trust Asset and (3) One-Month Adjusted CME Term SOFR and 30-day Average SOFR with respect to any such decrement table is used to calculate the interest rate with respect to the applicable Class.

17. The HECMs and the Participations underlying the Group 3, 4, 7 and 8 and Subgroup 6C Trust Assets and, in the case of Pools DF8424 and DG9028, the Group 11 and 12 Trust Assets each have annual interest rate adjustment caps of 2%. There are no periodic interest rate adjustment caps on the HECMs and the Participations underlying the Group 5, 9, 10, 11, 12, 13, 14, 15, 16 and 17 and Subgroup 6A and 6B Trust Assets (other than Pools DF8424 and DG9028 included in Trust Asset Groups 11 and 12).

18. The original term of the HECMs is 50 years. If a HECM remains outstanding after its original term of 50 years, a mandatory Ginnie Mae Issuer Purchase Event occurs with respect to such HECM.

19. No borrower changes payment plans.

20. Each Class is held from the Closing Date and is not exchanged in whole or in part.

21. Draws occur each month in respect of the Monthly Servicing Fee, if any, as set forth on Exhibit A or Exhibit E. No draws occur in respect of any set asides for property charges (such as taxes, hazard insurance, ground rents or assessments) or repairs.

22. As of the Closing Date, the Cumulative Deferred Interest Amount for each Group 7 and 8 Trust Asset is set forth on Exhibit D.

When reading the tables and the related text, investors should bear in mind that the Modeling Assumptions, like any other stated assumptions, are unlikely to be entirely consistent with actual experience.

- For example, most of the HECMs will not have the characteristics assumed, many Distribution Dates will occur on a Business Day after the 20th of the month, draw activity and prepayments, if

any, will occur throughout the month, draws will occur in respect of set asides for property charges and repairs, the Trustee may cause a termination of the Trust as described under “Description of the Securities — Termination” in this Supplement.

- In addition, distributions on the Securities are based on Certificate Factors and Calculated Certificate Factors, as applicable, which may not reflect actual receipts on the Trust Assets.

See “Description of the Securities — Distributions” in the Base Offering Circular.

Decrement Tables

Prepayments of mortgage loans are commonly measured by a prepayment standard or model. The model used in this Supplement is based on a prepayment curve (“PPC”) consisting of a series of Constant Prepayment Rates (“CPRs”). CPR is the standard prepayment assumption model of The Securities Industry and Financial Markets Association. CPR represents a constant rate of prepayment on the HECMs each month relative to the then outstanding aggregate principal balance of the HECMs for the life of those HECMs. See “Yield, Maturity and Prepayment Considerations — Standard Prepayment Assumption Models” in the Base Offering Circular.

The PPC and Draw Rates are based on the respective percentages in effect beginning on each Distribution Date as indicated in Exhibits B and C.

The decrement tables set forth below are based on the assumption that the HECMs prepay at the indicated percentages of PPC (the “PPC Prepayment Assumption Rates”). As used in the tables, each of the PPC Prepayment Assumption Rates reflects a percentage of the 100% PPC assumed prepayment curve. **The HECMs will not prepay at any of the PPC Prepayment Assumption Rates, and the timing of changes in the rate of prepayments actually experienced on the HECMs will not follow the pattern described for the PPC assumption.**

The decrement tables set forth below illustrate the percentage of the Original Class Principal Balance (or, in the case of a Notional Class, the original Class Notional Balance) that would remain outstanding following the distribution made each specified month for each Regular or MX Class, based on the assumptions that the related HECMs prepay at the PPC Prepayment Assumption Rates set forth in such tables, One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, 30-day Average SOFR and One-Year CMT, as applicable, are constant at the rates set forth in such tables and draws, if any, occur at the Draw Rates set forth in Exhibit C. The percentages set forth in the following decrement tables have been rounded to the nearest whole percentage (including rounding down to zero).

The decrement tables also indicate the Weighted Average Life of each Class under each PPC Prepayment Assumption Rate and each indicated level of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, 30-day Average SOFR and One-Year CMT, as applicable. The Weighted Average Life of each Class is calculated by:

- (a) multiplying the net reduction, if any, of the Class Principal Balance (or the net reduction of the Class Notional Balance, in the case of a Notional Class) from one Distribution Date to the next Distribution Date by the number of years from the date of issuance thereof to the related Distribution Date,
- (b) summing the results, and
- (c) dividing the sum by the aggregate amount of the assumed net reductions in principal balance or notional amount, as applicable, referred to in clause (a).

The information shown for each Notional Class is for illustrative purposes only, as a Notional Class is not entitled to distributions of principal based on its Class Notional Balance and has no Weighted Average Life. The Weighted Average Life shown for each Notional Class has been calculated on the assumption that a reduction in the Class Notional Balance thereof is a distribution of principal and further does not factor in any entitlement to the applicable Deferred Interest Amount. See the footnotes below related to the decrement tables for each Notional Class.

The Weighted Average Lives are likely to vary, perhaps significantly, from those set forth in the tables below due to the differences between the actual characteristics of the HECMs related to the Participations underlying the related Trust Assets and the Modeling Assumptions.

* The decrement tables for Class IA reflect only the Class IA Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year Adjusted CME Term SOFR. In addition to the current interest accrual amount on the Class IA Notional Balance at the Class IA Interest Rate, Class IA is entitled to the Class IA Deferred Interest Amount. No representation is made about the timing of distributions of the Class IA Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class IA.

* The decrement tables for Class IC reflect only the Class IC Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class IC Notional Balance at the Class IC Interest Rate, Class IC is entitled to the Class IC Deferred Interest Amount. No representation is made about the timing of distributions of the Class IC Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class IC.

* The decrement tables for Class IO reflect only the Class IO Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class IO Notional Balance at the Class IO Interest Rate, Class IO is entitled to the Class IO Deferred Interest Amount. No representation is made about the timing of distributions of the Class IO Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class IO.

* The decrement tables for Class ID reflect only the Class ID Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class ID Notional Balance at the Class ID Interest Rate, Class ID is entitled to the Class ID Deferred Interest Amount. No representation is made about the timing of distributions of the Class ID Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class ID.

* The decrement tables for Class EI reflect only the Class EI Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class EI Notional Balance at the Class EI Interest Rate, Class EI is entitled to the Class EI Deferred Interest Amount. No representation is made about the timing of distributions of the Class EI Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class EI.

* The decrement tables for Class HI reflect only the Class HI Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class HI Notional Balance at the Class HI Interest Rate, Class HI is entitled to the Class HI Deferred Interest Amount. No representation is made about the timing of distributions of the Class HI Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class HI.

* The decrement tables for Class IH reflect only the Class IH Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class IH Notional Balance at the Class IH Interest Rate, Class IH is entitled to the Class IH Deferred Interest Amount. No representation is made about the timing of distributions of the Class IH Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class IH.

* The decrement tables for Class LI reflect only the Class LI Notional Balance at various rates of PPC and at various levels of 30-day Average SOFR and One-Year CMT. In addition to the current interest accrual amount on the Class LI Notional Balance at the Class LI Interest Rate, Class LI is entitled to the Class LI Deferred Interest Amount. No representation is made about the timing of distributions of the Class LI Deferred Interest Amount other than that such amount will be paid no later than the Final Distribution Date for Class LI.

Yield Considerations

An investor seeking to maximize yield should make a decision whether to invest in any Regular or MX Class based on:

- the anticipated yield of that Class resulting from its purchase price,
- the investor's own projection of Maturity Events and deferrals of Maturity Events in respect of the HECMs related to the Participations underlying the HECM MBS,
- the investor's own projection of prepayments in respect of the HECMs related to the Participations underlying the HECM MBS,
- the investor's own projection of the occurrence of any Ginnie Mae Issuer Purchase Events,
- the investor's own projection of draw activity with respect to the HECMs,
- in the case of the Group 2 Securities, the investor's own projection of 30-day Average SOFR under a variety of scenarios,
- in the case of the Group 3 and 4 Securities, the investor's own projection of 30-day Average SOFR and One-Year Adjusted CME Term SOFR under a variety of scenarios,
- in the case of the Group 5, 6, 10, 11, 12, 13, 14, 15, 16 and 17 Securities, the investor's own projection of 30-day Average SOFR and One-Year CMT under a variety of scenarios,
- in the case of the Group 7 Securities, the investor's own projection of One-Month Adjusted CME Term SOFR and One-Year Adjusted CME Term SOFR under a variety of scenarios,
- in the case of the Group 8 Securities, the investor's own projection of 30-day Average SOFR, One-Month Adjusted CME Term SOFR and One-Year Adjusted CME Term SOFR under a variety of scenarios,
- in the case of the Group 9 Securities, the investor's own projection of 30-day Average SOFR and One-Month Adjusted CME Term SOFR under a variety of scenarios and
- in the case of the Group 5, 6, 7 and 8 Securities, the investors own projection of the rate of reduction and increase in principal or notional balance and deferred interest amounts of the Underlying Certificates under a variety of scenarios.

No representation is made regarding Maturity Events or prepayments in respect of the HECMs related to the Participations underlying the HECM MBS, the occurrence of any Ginnie Mae Issuer Purchase Events, One-Month Adjusted CME Term SOFR levels, One-Year Adjusted CME Term SOFR levels, 30-day Average SOFR levels, One-Year CMT levels, draw activity with respect to the HECMs, Underlying Certificate rates of reduction or increase in principal or notional balance and deferred interest amount or the yield on any Class.

Prepayments: Effect on Yields

The yields to investors will be sensitive in varying degrees to the rate of prepayments on the related HECMs.

- In the case of Regular or MX Securities purchased at a premium (especially the Interest Only Classes), faster than anticipated rates of principal payments could result in actual yields to investors that are lower than the anticipated yields.
- Investors in the Interest Only Classes should also consider the risk that rapid rates of principal payments could result in the failure of investors to recover fully their investments.
- In the case of Regular or MX Securities purchased at a discount, slower than anticipated rates of principal payments could result in actual yields to investors that are lower than the anticipated yields.

See *"Risk Factors — Rates of principal payments can reduce your yield" in this Supplement.*

Rapid rates of prepayments on the HECMs are likely to coincide with periods of low prevailing interest rates.

During periods of low prevailing interest rates, the yields at which an investor may be able to reinvest amounts received as principal payments on the investor's Class of Securities may be lower than the yield on that Class.

Slow rates of prepayments on the HECMs are likely to coincide with periods of high prevailing interest rates.

During periods of high prevailing interest rates, the amount of principal payments available to an investor for reinvestment at those high rates may be relatively low.

The HECMs will not prepay at any constant rate until maturity, nor will all of the HECMs underlying any Trust Asset Group or Subgroup prepay at the same rate at any one time. The timing of changes in the rate of prepayments may affect the actual yield to an investor, even if the average rate of principal prepayments is consistent with the investor's expectation. In general, the earlier a prepayment of principal on the related HECMs, the greater the effect on an investor's yield. As a result, the effect on an investor's yield of principal prepayments occurring at a rate higher (or lower) than the rate anticipated by the investor during the period immediately following the Closing Date is not likely to be offset by a later equivalent reduction (or increase) in the rate of principal prepayments.

One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, One-Year CMT and 30-day Average SOFR: Effect on Yields of the Floating Rate Classes

Low levels of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, One-Year CMT or 30-day Average SOFR, as applicable, can reduce the yield of the Floating Rate Classes. In addition, the Floating Rate Classes will not necessarily benefit from a higher yield at high levels of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, One-Year CMT or 30-day Average SOFR, as applicable, because the rate on such Classes is capped at a maximum rate described under "Terms Sheet — Interest Rates." See "*Risk Factors — The levels of any interest rate indices applicable to the group 3 through 17 Trust Assets or securities will affect payments and yields on the group 3 through 17 securities*" in this Supplement.

Payment Delay: Effect on Yields of the Delay Classes

The effective yield on any Delay Class will be less than the yield otherwise produced by its Interest Rate and purchase price because, on each Distribution Date, 30 days' interest will be payable on (or will accrue with respect to) that Class even though interest began to accrue approximately 50 days earlier.

Yield Tables

The following tables show the pre-tax yields to maturity on a corporate bond equivalent basis of specified Classes at various constant percentages of PPC, in the case of Class IB, at various constant levels of 30-day Average SOFR, in the case of Classes AI and IA, at various constant levels of One-Year Adjusted CME Term SOFR and 30-day Average SOFR, in the case of Classes BI, CI, EI, HI, IC, ID, IG, IH, IJ, IL, IM, IO, JI, LI and MI, at various constant levels of One-Year CMT and 30-day Average SOFR, in the case of Class DI, at various constant levels of One-Month Adjusted CME Term SOFR and 30-day Average SOFR, in the case of Class IE, at various constant levels of One-Month Adjusted CME Term SOFR and One-Year Adjusted CME Term SOFR and, in the case of Classes GI, IK and KI, at various constant levels of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR and 30-day Average SOFR.

The HECMs will not prepay or draw at any constant rate until maturity, and it is unlikely that One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, One-Year CMT or 30-day Average SOFR will remain constant. Moreover, it is likely that the HECMs will experience actual prepayment and draw rates that differ from those of the Modeling Assumptions. **Therefore, the actual pre-tax yield of any Class may differ from those shown in the applicable table below for that Class even if the Class is purchased at the assumed price shown.**

The yields were calculated by

1. determining the monthly discount rates that, when applied to the applicable assumed streams of cash flows to be paid on the applicable Class, would cause the discounted present value of the assumed streams of cash flows to equal the assumed purchase price of that Class plus accrued interest, and
2. converting the monthly rates to corporate bond equivalent rates.

These calculations do not take into account variations that may occur in the interest rates at which investors may be able to reinvest funds received by them as distributions on their Securities and consequently do not purport to reflect the return on any investment in any Class when those reinvestment rates are considered.

The information set forth in the following tables was prepared on the basis of the Modeling Assumptions and the assumptions that (1) the Interest Rate applicable to each Floating Rate Class and the Group 6 and Subgroup 5B, 5C and 8B Trust Assets for each Accrual Period following the first Accrual Period will be based on the indicated level of 30-day Average SOFR, (2) the HECM MBS Rates applicable to the Group 10, 11, 12, 13, 14, 15, 16 and 17 and Subgroup 5A Trust Assets for each Accrual Period following the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit A will be based on the indicated level of One-Year CMT, (3) the HECM MBS Rates applicable to the Group 3 and 4 Trust Assets for each Accrual Period following the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit A will be based on the indicated level of One-Year Adjusted CME Term SOFR, (4) HECM MBS Rates applicable to the Group 9 Trust Assets for each Accrual Period following the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit A will be based on the indicated level of One-Month Adjusted CME Term SOFR, (5) the Interest Rate applicable to the Group 7 and Subgroup 8A Trust Assets for each Accrual Period following the first Accrual Period will be based on the indicated level of One-Month Adjusted CME Term SOFR, (6) the HECM MBS Rates applicable to the HECMs underlying the Group 7 and 8 Trust Assets for each Accrual Period following the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit E will be based on the indicated level of One-Year Adjusted CME Term SOFR, (7) the HECM MBS Rates applicable to the HECMs underlying the Group 6 and Subgroup 5B and 5C Trust Assets for each Accrual Period following the applicable Approximate Weighted Average Next Rate Reset Month shown in Exhibit E will be based on the indicated level of One-Year CMT and (8) the purchase price of each Class (expressed as a percentage of its original Class Notional Balance) plus accrued interest is as indicated in the related table. **The assumed purchase price is not necessarily that at which actual sales will occur.**

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSEQUENCES

The following tax discussion, when read in conjunction with the discussion of “Certain United States Federal Income Tax Consequences” in the Base Offering Circular, describes the material United States federal income tax considerations for investors in the Securities. However, these two tax discussions do not purport to deal with all United States federal tax consequences applicable to all categories of investors, some of which may be subject to special rules.

REMIC Elections

In the opinion of Cleary Gottlieb Steen & Hamilton LLP, the Trust will constitute a Double REMIC Series as to the Group 1 Trust Assets, a Double REMIC Series as to the Group 2 Trust Assets, a Double REMIC Series as to the Group 3 Trust Assets, a Double REMIC Series as to the Group 4 Trust Assets, a Double REMIC Series as to the Group 5 Trust Assets, a Double REMIC Series as to the Group 6 Trust Assets, a Double REMIC Series as to the Group 7 Trust Assets, a Double REMIC Series as to the Group 8 Trust Assets and a Double REMIC Series as to the Group 9 through 17 Trust Assets, each for United States federal income tax purposes. Separate REMIC elections will be made for the Group 1 Issuing REMIC, the Group 1 Pooling REMIC, the Group 2 Issuing REMIC, the Group 2 Pooling REMIC, the Group 3 Issuing REMIC, the Group 3 Pooling REMIC, the Group 4 Issuing REMIC, the Group 4 Pooling REMIC, the Group 5 Issuing REMIC, the Group 5 Pooling REMIC, the Group 6 Issuing REMIC, the Group 6 Pooling REMIC, the Group 7 Issuing REMIC, the Group 7 Pooling REMIC, the Group 8 Issuing REMIC, the Group 8 Pooling REMIC, the Group 9 through 17 Issuing REMIC and the Group 9 through 17 Pooling REMIC.

Regular Securities

The Regular Securities will be treated as debt instruments issued by the Group 1 Issuing REMIC, the Group 2 Issuing REMIC, the Group 3 Issuing REMIC, the Group 4 Issuing REMIC, the Group 5 Issuing REMIC, the Group 6 Issuing REMIC, the Group 7 Issuing REMIC, the Group 8 Issuing REMIC, or the Group 9 through 17 Issuing REMIC, as applicable, for United States federal income tax purposes. Income on the Regular Securities must be reported under an accrual method of accounting.

The Notional and HECM MBS Accrual Classes of Regular Securities will be issued with original issue discount (“OID”). See *“Certain United States Federal Income Tax Consequences — Tax Treatment of Regular Securities — Original Issue Discount,” “— Variable Rate Securities” and “— Interest Weighted Securities and Non-VRDI Securities” in the Base Offering Circular.*

The prepayment assumption that should be used, among other things, in determining the rates of accrual of OID on the Regular Securities is 100% PPC (as described in “Yield, Maturity and Prepayment Considerations” in this Supplement). In the case of the Floating Rate Classes, the interest rate values to be used for these determinations are the initial Interest Rates as set forth in the Terms Sheet under “Interest Rates.” No representation is made, however, about the rate at which prepayments on the HECMs underlying any Group of Participations actually will occur or the level of One-Month Adjusted CME Term SOFR, One-Year Adjusted CME Term SOFR, 30-day Average SOFR or One-Year CMT at any time after the date of this Supplement. See *“Certain United States Federal Income Tax Consequences” in the Base Offering Circular.* In view of the complexities as to the manner of inclusion in income of OID on the Regular Securities, investors should consult their own tax advisors to determine the appropriate amount and method of inclusion in income of OID on the Regular Securities for United States federal income tax purposes.

The Regular Securities generally will be treated as “regular interests” in a REMIC for domestic building and loan associations and “real estate assets” for real estate investment trusts (“REITs”) as described in “Certain United States Federal Income Tax Consequences” in the Base Offering Circular. Similarly, interest on the Regular Securities will be considered “interest on obligations secured by mortgages on real property” for REITs as described in “Certain United States Federal Income Tax Consequences” in the Base Offering Circular.

Residual Securities

Each Class of Residual Securities will represent the beneficial ownership of the Residual Interest in the related Trust REMICs, as shown below:

<u>Residual Securities</u>	<u>Trust REMIC</u>
Class RR Securities	Group 9 through 17 Pooling REMIC and Group 9 through 17 Issuing REMIC
Class RR1 Securities	Group 1 Pooling REMIC and Group 1 Issuing REMIC
Class RR2 Securities	Group 2 Pooling REMIC and Group 2 Issuing REMIC
Class RR3 Securities	Group 3 Pooling REMIC and Group 3 Issuing REMIC
Class RR4 Securities	Group 4 Pooling REMIC and Group 4 Issuing REMIC
Class RR5 Securities	Group 5 Pooling REMIC and Group 5 Issuing REMIC
Class RR6 Securities	Group 6 Pooling REMIC and Group 6 Issuing REMIC
Class RR7 Securities	Group 7 Pooling REMIC and Group 7 Issuing REMIC
Class RR8 Securities	Group 8 Pooling REMIC and Group 8 Issuing REMIC

The Residual Securities generally will be treated as “residual interests” in a REMIC for domestic building and loan associations and as “real estate assets” for REITs, as described in “Certain United States Federal Income Tax Consequences” in the Base Offering Circular, but will not be treated as debt for United States federal income tax purposes. Instead, the Holders of the Residual Securities will be required to report, and will be taxed on, their pro rata shares of the taxable income or loss of the related Trust REMICs, and these requirements will continue until there are no outstanding regular interests in the respective Trust REMICs. Thus, Residual Holders will have taxable income attributable to the Residual Securities even though they will not receive principal or interest distributions with respect to the Residual Securities, which could result in a negative after-tax return for the Residual Holders. Even though the Holders of the Residual Securities are not entitled to any stated principal or interest payments on the Residual Securities, the related Trust REMICs may have substantial taxable income in certain periods, and offsetting tax losses may not occur until much later periods. Accordingly, the Holders of the Residual Securities may experience substantial adverse tax timing consequences. Prospective investors are urged to consult their own tax advisors and consider the after-tax effect of ownership of the Residual Securities and the suitability of the Residual Securities to their investment objectives.

Prospective Holders of Residual Securities should be aware that, at issuance, based on the expected prices of the Regular and Residual Securities and the prepayment assumption described above, the residual interests represented by the Residual Securities will be treated as “noneconomic residual interests” as that term is defined in Treasury regulations.

OID accruals on the Underlying Certificates will be computed using the same prepayment assumptions as set forth under “Certain United States Federal Income Tax Consequences — Regular Securities” in this Supplement.

MX Securities

For a discussion of certain United States federal income tax consequences applicable to the MX Classes, see “Certain United States Federal Income Tax Consequences — Tax Treatment of MX Securities,” “— Exchanges of MX Classes and Regular Classes” and “— Taxation of Foreign Holders of REMIC Securities and MX Securities” in the Base Offering Circular.

Investors should consult their own tax advisors in determining the United States federal, state, local, foreign and any other tax consequences to them of the purchase, ownership and disposition of the Securities.

ERISA MATTERS

Ginnie Mae guarantees distributions of principal and interest with respect to the Securities. The Ginnie Mae Guaranty is supported by the full faith and credit of the United States of America. The Regular and MX Securities will qualify as “guaranteed governmental mortgage pool certificates” within the meaning of a Department of Labor regulation, the effect of which is to provide that mortgage loans and participations therein underlying a “guaranteed governmental mortgage pool certificate” will not be considered assets of an employee benefit plan subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), or subject to Section 4975 of the Code (each, a “Plan”), solely by reason of the Plan’s purchase and holding of that certificate.

Prospective Plan Investors should consult with their advisors to determine whether the purchase, holding or resale of a Security could give rise to a transaction that is prohibited or is not otherwise permissible under either ERISA or the Code.

Governmental plans and certain church plans, while not subject to the fiduciary responsibility provisions of ERISA or the prohibited transaction provisions of ERISA and the Code, may nevertheless be subject to local, state or other federal laws that are substantially similar to the foregoing provisions of ERISA and the Code (“Similar Law”).

Fiduciaries of any such Plans or governmental or church plans subject to Similar Law should consult with their counsel before purchasing any of the Securities.

See “ERISA Considerations” in the Base Offering Circular.

The Residual Securities are not offered to, and may not be transferred to, a Plan Investor.

LEGAL INVESTMENT CONSIDERATIONS

Institutions whose investment activities are subject to legal investment laws and regulations or to review by certain regulatory authorities may be subject to restrictions on investment in the Securities. **No representation is made about the proper characterization of any Class for legal investment or other purposes, or about the permissibility of the purchase by particular investors of any Class under applicable legal investment restrictions.**

Investors should consult their own legal advisors regarding applicable investment restrictions and the effect of any restrictions on the liquidity of the Securities prior to investing in the Securities.

See “Legal Investment Considerations” in the Base Offering Circular.

PLAN OF DISTRIBUTION

Subject to the terms and conditions of the Sponsor Agreement, the Sponsor has agreed to purchase all of the Securities if any are sold and purchased. The Sponsor proposes to offer the Regular and MX Classes to the public from time to time for sale in negotiated transactions at varying prices to be determined at the time of sale, plus accrued interest from (1) February 1, 2025 on the Delay Classes and (2) February 20, 2025 on the Floating Rate Classes and Classes B, EI, HI, IG, IH, IJ, IL, IM, LI and MI. The Sponsor may effect these transactions by sales to or through certain securities dealers. These dealers may receive compensation in the form of discounts, concessions or commissions from the Sponsor and/or commissions from any purchasers for which they act as agents. Some of the Securities may be sold through dealers in relatively small sales. In the usual case, the commission charged on a relatively small sale of securities will be a higher percentage of the sales price than that charged on a large sale of securities.

INCREASE IN SIZE

Before the Closing Date, Ginnie Mae, the Trustee and the Sponsor may agree to increase the size of this offering. In that event, the Securities will have the same characteristics as described in this Supplement, except that (1) the Original Class Principal Balance (or original Class or Component Notional Balance) and (2) the Original Component Principal Balance of each Component of each related Class of each Class or Component receiving principal distributions or interest distributions based upon a notional balance from the same Trust Asset Group or Subgroup will increase by the same proportion. The Trust Agreement, the Final Data Statement and the Supplemental Statement, if any, will reflect any increase in the size of the transaction.

LEGAL MATTERS

Certain legal matters will be passed upon for Ginnie Mae by Hunton Andrews Kurth LLP, for the Trust by Cleary Gottlieb Steen & Hamilton LLP and Marcell Solomon & Associates, P.C., and for the Trustee by Faegre Drinker Biddle & Reath LLP.

(1) All exchanges must comply with minimum denomination restrictions.

(2) The amount shown for each MX Class represents the maximum Original Class Principal Balance or original Class Notional Balance of that Class, assuming it were to be issued on the Closing Date.

(3) As defined under "Class Types" in Appendix I to the Base Offering Circular.

(4) See "Yield, Maturity and Prepayment Considerations — Final Distribution Date" in this Supplement.

(5) The Interest Rate will be calculated as described under "Terms Sheet — Interest Rates" in this Supplement.

(6) Derived from REMIC Classes relating to separate Groups.

(7) The Class Principal Balance of Class B will increase or decrease, as applicable, with 100% of the sum of (a) 15.6250000000% of the Class FE Principal Balance and (b) 21.8750000000% of the Class EI Deferred Interest Amount.

- (3) The Approximate Weighted Average HECM Age (in months) is the weighted average age of the HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan as of February 1, 2025.
- (4) The Rate Reset Frequency is a period, whether annually or monthly, that the interest rate of each adjustable rate HECM resets under the interest rate formula and HECM loan documents applicable to each adjustable rate HECM.
- (5) The Approximate Weighted Average Next Rate Reset Month is the weighted average number of months until the interest rate of each adjustable rate HECM resets under the interest rate formula and HECM loan documents applicable to each adjustable rate HECM. For example, an entry of "1" signifies that the Approximate Weighted Average Next Rate Reset Month for the adjustable rate HECM's rate is the first day of March 2025.
- (6) The Approximate Weighted Average Gross Interest Rate is the weighted average of the gross interest rates of the HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan as of February 1, 2025.
- (7) The Approximate Weighted Average Gross Margin is the weighted average of the gross margins of the adjustable rate HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan as of February 1, 2025.
- (8) The Approximate Weighted Average Gross Lifetime Interest Rate Floor is the weighted average of the lowest interest rates possible based on the interest rate formula and HECM loan documents applicable to the adjustable rate HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
- (9) The Approximate Weighted Average Gross Lifetime Interest Rate Cap is the weighted average of the maximum interest rates possible based on the interest rate formula and HECM loan documents applicable to the adjustable rate HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
- (10) The Approximate Weighted Average MIP Fee is the weighted average of the MIP Fees of the HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan as of February 1, 2025. The MIP Fee is charged for FHA mortgage insurance. The MIP Fee is the monthly mortgage insurance premium ("MIP") that accrues on each HECM.
- (11) The Approximate Weighted Average Servicing Fee Margin is the weighted average of the Servicing Fee Margins of the HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan as of February 1, 2025. The Servicing Fee Margin represents (together with the Monthly Servicing Fee, if any) the amount of the servicing compensation payable to the Issuer to cover the Issuer's servicing costs. The Servicing Fee Margin includes the Guaranty Fee charged by Ginnie Mae for the HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS guaranty at the annual rate of 0.06% and a participation agent fee, if any. The Approximate Weighted Average Servicing Fee Margin is included in the rates shown in the columns for Approximate Weighted Average Gross Interest Rate, Approximate Weighted Average Gross Margin, Approximate Weighted Average Gross Lifetime Interest Rate Floor and Approximate Weighted Average Gross Lifetime Interest Rate Cap.
- (12) The Monthly Servicing Fee is the aggregate monthly servicing fee payable to the Issuer if the full amount of the servicing cost is not included in the HECM interest rate and is in addition to the Servicing Fee Margin.
- (13) The Initial Monthly Scheduled Draw is the aggregate monthly amount that is payable to borrowers in a given month under certain types of payment plans during the first twelve month disbursement period.
- (14) The Subsequent Monthly Scheduled Draw is the aggregate monthly amount that is payable to borrowers in a given month under certain types of payment plans after the first twelve month disbursement period.
- (15) The Approximate Weighted Average Remaining Draw Term (in months) is the weighted average of the remaining draw terms of the HECMs related to the Participations underlying the related HECM MBS or Ginnie Mae Platinum Certificate backed by HECM MBS for such payment plan. The remaining draw term represents the number of months over which a borrower with a term or modified term payment plan will receive Monthly Scheduled Draws as of February 1, 2025.
- (16) The Initial Available Line of Credit is the aggregate of the lines of credit available to borrowers under the Modified Term, Modified Tenure and Line of Credit payment plans during the first twelve month disbursement period. The Initial Available Line of Credit does not include set asides for the Monthly Servicing Fee, if any, property charges (such as taxes, hazard insurance, ground rents or assessments) or repairs, if any.
- (17) The Available Line of Credit is the aggregate of the lines of credit available to borrowers under the Modified Term, Modified Tenure and Line of Credit payment plans during the lives of their related HECMs. The Available Line of Credit does not include set asides for the Monthly Servicing Fee, if any, property charges (such as taxes, hazard insurance, ground rents or assessments) or repairs, if any.
- (18) The sum of the applicable Maximum Claim Amounts with respect to each HECM.

- (19) These HECMs do not have draw terms or monthly scheduled draws.
- (20) Borrowers who select tenure or modified tenure payment plans have a right to receive monthly draws for their tenure in the property.
- (21) These HECMs do not have a flat Monthly Servicing Fee in addition to the Servicing Fee Margin.
- (22) These HECMs are not subject to restrictions on the amount of the Available Line of Credit available to borrowers during the first twelve month disbursement period.
- (23) The draw terms for these HECMs have expired.
- (24) Platinum Pool

The actual HECM ages, gross interest rates, gross margins, gross lifetime interest rate floors, gross lifetime interest rate caps, MIP Fees, Servicing Fee Margins and remaining draw terms of many of the HECMs related to the Participations underlying the Trust Assets will differ from the approximate weighted averages shown above, perhaps significantly. See *"The Trust Assets — The Participations and the HECMs" in this Supplement.*

- (1) As defined under "Class Types" in Appendix I to the Base Offering Circular.
- (2) Underlying Certificate Factors are as of February 2025.
- (3) The Principal or Notional Balance in Trust was obtained using the current Class Principal or Notional Balance of the related Underlying Certificate from data provided to the Sponsor by the participation agent as of February 1, 2025 instead of the truncated balance from ginnie Mae.gov.
- (4) Based on information as of the first Business Day of February 2025.
- (5) See "Terms Sheet — Interest Rates" in the Underlying Certificate Disclosure Document.

(1) The information in this Updated Exhibit A is provided by the Sponsor as of February 1, 2025. It is based on information regarding the HECM MBS, the related Participations and the HECMs related to the Participations underlying the Group 6 through 8 and Subgroup 5B and 5C Trust Assets. All

- weighted averages provided in this Updated Exhibit A are weighted based on the outstanding principal amounts of the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025. The information shown in this Updated Exhibit A is for 100% of the relevant pool; however, the Group 5, 6, 7 and 8 securities are only entitled to the Group 6 through 8 and Subgroup 5B and 5C Trust Assets.
- (2) The HECM MBS Principal Balance is the sum of the outstanding principal amounts of the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (3) The Approximate Weighted Average HECM Age (in months) is the weighted average age of the HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (4) The Rate Reset Frequency is a period, whether annually or monthly, that the interest rate of each adjustable rate HECM resets under the interest rate formula and HECM loan documents applicable to each adjustable rate HECM.
 - (5) The Approximate Weighted Average Next Rate Reset Month is the weighted average number of months until the interest rate of each adjustable rate HECM resets under the interest rate formula and HECM loan documents applicable to each adjustable rate HECM. For example, an entry of "1" signifies that the Approximate Weighted Average Next Rate Reset Month for the adjustable rate HECM's rate is the first day of March 2025.
 - (6) The Approximate Weighted Average Gross Interest Rate is the weighted average of the gross interest rates of the HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (7) The Approximate Weighted Average Gross Margin is the weighted average of the gross margins of the adjustable rate HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (8) The Approximate Weighted Average Gross Lifetime Interest Rate Floor is the weighted average of the lowest interest rates possible based on the interest rate formula and HECM loan documents applicable to the adjustable rate HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (9) The Approximate Weighted Average Gross Lifetime Interest Rate Cap is the weighted average of the maximum interest rates possible based on the interest rate formula and HECM loan documents applicable to the adjustable rate HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025.
 - (10) The Approximate Weighted Average MIP Fee is the weighted average of the MIP Fees of the HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025. The MIP Fee is charged for FHA mortgage insurance. The MIP Fee is the monthly mortgage insurance premium ("MIP") that accrues on each HECM.
 - (11) The Approximate Weighted Average Servicing Fee Margin is the weighted average of the Servicing Fee Margins of the HECMs related to the Participations underlying the related HECM MBS for such payment plan as of February 1, 2025. The Servicing Fee Margin represents (together with the Monthly Servicing Fee, if any) the amount of the servicing compensation payable to the Issuer to cover the Issuer's servicing costs. The Servicing Fee Margin includes the Guaranty Fee charged by Ginnie Mae for the HECM MBS guaranty at the annual rate of 0.06% and a participation agent fee, if any. The Approximate Weighted Average Servicing Fee Margin is included in the rates shown in the columns for Approximate Weighted Average Gross Interest Rate, Approximate Weighted Average Gross Margin, Approximate Weighted Average Gross Lifetime Interest Rate Floor and Approximate Weighted Average Gross Lifetime Interest Rate Cap.

- (12) The Monthly Servicing Fee is the aggregate monthly servicing fee payable to the Issuer if the full amount of the servicing cost is not included in the HECM interest rate and is in addition to the Servicing Fee Margin.
- (13) The Initial Monthly Scheduled Draw is the aggregate monthly amount that is payable to borrowers in a given month under certain types of payment plans during the first twelve month disbursement period.
- (14) The Subsequent Monthly Scheduled Draw is the aggregate monthly amount that is payable to borrowers in a given month under certain types of payment plans after the first twelve month disbursement period.
- (15) The Approximate Weighted Average Remaining Draw Term (in months) is the weighted average of the remaining draw terms of the HECMs related to the Participations underlying the related HECM MBS for such payment plan. The remaining draw term represents the number of months over which a borrower with a term or modified term payment plan will receive Monthly Scheduled Draws as of February 1, 2025.
- (16) The Initial Available Line of Credit is the aggregate of the lines of credit available to borrowers under the Modified Term, Modified Tenure and Line of Credit payment plans during the first twelve month disbursement period. The Initial Available Line of Credit does not include set asides for the Monthly Servicing Fee, if any, property charges (such as taxes, hazard insurance, ground rents or assessments) or repairs, if any.
- (17) The Available Line of Credit is the aggregate of the lines of credit available to borrowers under the Modified Term, Modified Tenure and Line of Credit payment plans during the lives of their related HECMs. The Available Line of Credit does not include set asides for the Monthly Servicing Fee, if any, property charges (such as taxes, hazard insurance, ground rents or assessments) or repairs, if any.
- (18) The sum of the applicable Maximum Claim Amounts with respect to each HECM.
- (19) These HECMs do not have draw terms or monthly scheduled draws.
- (20) Borrowers who select tenure or modified tenure payment plans have a right to receive monthly draws for their tenure in the property.
- (21) These HECMs do not have a flat Monthly Servicing Fee in addition to the Servicing Fee Margin.
- (22) The Lines of Credit related to these HECMs are fully drawn.
- (23) These HECMs are not subject to restrictions on the amount of the Available Line of Credit available to borrowers during the first twelve month disbursement period.
- (24) The draw terms for these HECMs have expired.

The actual HECM ages, gross interest rates, gross margins, gross lifetime interest rate floors, gross lifetime interest rate caps, MIP Fees, Servicing Fee Margins and remaining draw terms of many of the HECMs related to the Participations underlying the Group 6 through 8 and Subgroup 5B and 5C Trust Assets will differ from the approximate weighted averages shown above, perhaps significantly.
